

Section 10.1: The Periodic Table and Chemical Bonding

Learning Objectives

Students will be able to:

- Identify the elements in the periodic table.
- Identify the groups and periods in the periodic table.
- Identify the elements in the periodic table.

Learning Objectives

Students will be able to:

- Identify the elements in the periodic table.
- Identify the groups and periods in the periodic table.
- Identify the elements in the periodic table.

Periodic Table

The periodic table is a table of elements that are arranged in a grid pattern.

- Elements are arranged in groups and periods.
- Elements are arranged in groups and periods.
- Elements are arranged in groups and periods.

The periodic table is a table of elements that are arranged in a grid pattern.
