There are two color bars on this proof and in the art file. One to be used with X-rite TI Pro Spectrophotometer. The other can be used with most other spectrophotometers.
Printers must repeat one of the two color bars all the way across the width (gripper edge) of the press sheets on sample runs and production runs. Failure to comply will result in the remaking of film and/or plates at your cost.
我妈妈以及设计空间在这个两种色度。一种是用于X-rite 《查色器》 TI Pro 分光光度计。另一种是用于其它大部分的分光光度计。在打样或者印量生产时。印刷厂必须选择其中一种色带并重复添加直到覆盖整张纸的宽度（见以上）。没有按照上述要求而导致重新出菲林，出现的费用将由印刷厂承担。
