Little Giant

ON-X™ PLUS

STAND TALL. STAY STEADY.

The ON-X Plus Step Stool pairs a stable, oversized platform with the durability of fiberglass and steel — built for quick jobs around the house or on the site.

YOUR GEAR, UP TOP

Fold-up tool tray gives you tool ports, friction locks, and a magnetic tray keep drills, fasteners, screwdrivers, and paint cans within reach.

WORK WITH CONFIDENCE

When not needed, fold the tool tray down for extra handrail support. A sturdy place to hold for more stability during the climb and on the job.

BUILT TO OUTLAST THE JOB

Every detail of the ON-X is designed for stability, durability, and everyday convenience.

SCAN TO SEE IT IN ACTION!

BUILT-IN WORKSTATION

The flip-up tool tray keeps your gear right at the top. Drills, bits, fasteners, clip-ons, screwdrivers, even paint cans, plus a magnetic tray that holds small stuff tight.

FLIP DOWN. FLIP UP. GO.

When you don't need the tool tray, fold it down to create a handrail for the climb up, instead.

ROOM TO STAND, ROOM TO WORK

Spacious 11.5" x 13.75" platform gives you secure, stable footing and plenty of room for the job at hand.

STORE IT ANYWHERE

2.5" storage profile slides into tight spaces — closets, trunks, under the bench, anywhere you have a couple inches to spare.

SLIP-RESISTANT FEET

Slip-resistant feet with a wide base keep the ladder steady on hard floors, carpet, or shop surfaces.
