

suma) Chlorine Sanitizer

D44

10.8 percent sodium hypochlorite (chlorine) sanitizer, especially for low temp dishmachines.

Features & Benefits

- Ideal for food processing and beverage industries, hospital and institutional laundries and textile industries
- 10.8 percent hypochlorite sanitizer
- Can also be used as a vegetable wash

Applications

• For use with low temp dishmachines

Suma® Chlorine Sanitizer D44

Use instructions

General Sanitizing

- For sanitizing food processing and beverage plant equipment, rinse with a 200 mL/100 L (200 ppm) solution of Suma[®] Chlorine Sanitizer D44 for 2 minutes.
- At higher concentrations, a final potable water rinse is required.
- For other applications, consult your Diversey representative.
- May be used in final rinse waters for sanitizing hard nonporous surfaces which may have previously been cleaned with a suitable cleaning agent followed by a potable water rinse.
- Use concentrations of available chlorine must not exceed 200 ppm in the final rinse waters and all reasonable precautions must be taken to avoid contamination of food.

Vegetable Washing

• Wash vegetables in a solution containing 10mL/10L (100 ppm) of water. DO NOT allow vegetables to soak in the solution for more than a few minutes. Drain and rinse thoroughly with fresh potable water.

Safe handling

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use; and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. SDS are available online at www.diversey.com or by calling 888.352.2249. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate. Please refer to the Diversey HazMat Library, only available through Internet Explorer, http://naextranet.diversey.com/dot/, for up-to-date shipping information.
