INSTALLATION GUIDE BEFORE YOU BEGIN

- Please check the product for damage and missing parts immediately upon delivery. Damage reported later will not be covered by our warranty. Please handle the product with care. Avoid any impact to the sides and edges of the toilet.
- Consult your local plumbing & building codes prior to installation.

WARNING

- Handle with care. Vitreous chinaware is glasslike with sharp edges if broken. Do not drop, handle roughly, or overtighten bolts.

TOOLS AND MATERIALS

Wrench

Putty Knife

Screwdriver

Adjustable Plier

Thank you for purchasing ANZZI TOILET. Please read and follow the installation and operation instructions carefully, to ensure the long life and reliable operation of this appliance. FAILURE TO DO SO COULD CAUSE PROPERTY DAMAGE OR SERIOUS INJURY. Please keep this manual for future reference.

[23]	Metal Gasket	2
[24]	Lock Nut	2
[25]	Seat with Lid	1
[26]	Toilet	1

TOILET INSTALLATION

⚠ ATTENTION

- To avoid personal injury or property damage, identify components and read all instructions before installing.
- Follow the instructions below to remove your old toilet and install ANZZI TOILET. Toilet Flange is not provided. You may need to buy it for new installation.

1

- Turn off the water supply and flush the tank completely. Remove remaining water from tank and bowl with towel or sponge.
- Disconnect and remove the old water supply line.
- Remove the bowl from the floor by removing the bolt caps and the floor bolt nuts.
- Temporarily plug the floor flange with a towel or cover to block sewer gases from escaping.
- NOTE: The mounting surface should be clean and level before the new toilet is installed.

2

Remove existing bolts and wax (if necessary).

3

Place the Toilet [26] carefully upside down on a soft surface to prevent any scratches. Position the Wax Ring [11] evenly around the waste flange (horn), ensuring the tapered end faces outward. Apply a thin layer of sealant evenly around the toilet base.

INSTALLATION

4

Slide the Lock Bolts [07] into the Floor Flange until they reach the stopping point. Position the Gaskets [10] onto the Lock Bolt [07], ensuring their flat surface faces downward, and slide them to the stopping point.
Position Toilet [26] on Floor Flange. Make sure the bolts go through the holes of the Toilet [26].
Attention: Do not shake the toilet back and forth as this may damage the seal.

5

Slide the Gaskets [06] and Metal Washers [09] onto the Lock Bolt [07]. Tighten the Lock Nuts [08] to secure. DO NOT OVER TIGHTEN!
Cover the Lock Bolt [07] with Bolt Caps [05]. Cut the tail of Lock Bolts [07] if needed.
Attention: Pour water into bowl to prevent the escape of sewer gas. Make sure the Gaskets [06] with mark "This side up" faces upward.

6

- Secure the Sealing Gasket [04] to the Drain Hole, ensuring its flat surface faces upward.
- Carefully position the Tank [02] onto the Toilet [26].
- Remove any additional parts from Bolts [16], leaving only the Metal Gaskets [17] and Rubber Gaskets [18] in place.
- Insert the Bolts [16] through the holes in the Tank [02] and align them with the corresponding holes on either side of the Toilet's [26] drain hole.
- Place the Rubber Gaskets [19] and Metal Gaskets [20] onto the Bolts [16] in the specified order. Fasten the Tank [02] by carefully tightening the Nuts [21].
Avoid overtightening to prevent damage.
- Slide the Rubber Gaskets [22] and Metal Gaskets [23] on to the Bolts [16]. Tighten the Lock Nuts [24] to secure.

7

- Connect the Hose (not provided) to the Supply Inlet of the toilet and the Supply Stop Valve. Use the Adapter [12] between the Supply Inlet and the Hose if needed.
- Tighten the tank connection coupling nut 1/4 turn beyond hand tight.
- Turn on the Supply Stop Valve and allow the toilet tank to fill.
- Check for leakage at all connections. Tighten if necessary.
DO NOT OVER TIGHTEN.

INSTALLATION

Install the **Anchors [13]** to the **Toilet [26]**.

Open the **Cover of Seat with Lid [25]**.

Place the **Seat with Lid [25]** onto the **Toilet [26]**. Align the **Seat [25]** with the **Toilet [26]** for proper positioning. Attach the **Metal Gasket [15]** to the **Seat with Lid [25]**, then insert the **Bolt [14]** through both components. Secure the **Bolt [14]** by tightening it firmly, but avoid overtightening.

Close the **Cover**.

- Remove the **Nut** and **Washer** from the **Handle Assembly [03]**. Install the **Handle Assembly [03]** to the outside of **Tank [02]** as the figure shows. Connect the **Chain** to the end of the **Lever Arm**. Adjust the length of the **Chain** so that it can pull up the **flapper** when pushing down the **Handle Assembly [03]** and can be closed when releasing the **Handle Assembly [03]**.
- Adjust water level in tank by turning **Water Level Adjustment Knob** to move **Float Cup** up or down.
Notice: Water level should be lower than the top of **Overflow Tube**.
- Gently place the **Cover [01]** onto the top of the **Tank [02]** to finish the installation.

CLEANING and MAINTENANCE

When cleaning your toilet, wash it with mild, soapy water, rinse thoroughly with clear water and dry with a soft cloth. Avoid detergents, disinfectants, or cleaning products in aerosol cans. NEVER use abrasive scouring powders or abrasive pads on your toilet seat. Some bathroom chemicals and cosmetics may damage the seat's finish.

ATTENTION: Do not use in-tank cleaners. Products containing chlorine (calcium hypochlorite) can seriously damage fittings in the tank. This damage can cause leakage and property damage. ANZZI shall not be responsible or liable for any tank fitting damage caused by the use of cleaners containing chlorine (calcium hypochlorite).

TROUBLE SHOOTING

Symptoms	Probable Causes	Trouble Shooting
Poor flush.	Supply Stop Valve is not fully open.	Open the Supply Stop Valve
Toilet discharges water continuously	The Chain connecting to the Lever Arm is too short	Adjust the length of Chain
Excessive noise when tank is filling.	Flush Valve is blocked	Remove dirt or obstruction from the valve head. Flush the lines.

SAFETY PRECAUTIONS

Please carefully read the safety precautions before installation. This is important and must be observed.

DANGER

Only connect to a Ground-Fault Circuit-Interrupter(GFCI) protected grounded socket.

Do not remove the ground pin or use a ground adapter.

Otherwise, electric shock will be caused by fault or short circuit.

WARNING

●Any modification to your ENVO Electric Bidet Seat will invalidate the warranty. If cables, plugs or other components need to be repaired or replaced, they need to be installed by qualified electricians.

●Any replacement shall be provided by ANZZI. The use of a third-party replacement will invalidate the warranty.

●Cut off the power supply before maintenance.

●Ensure that the bathroom is well ventilated to avoid moisture accumulation. Installing the electric bidet seat in a humid place may cause electrical failure of the product.

●In any case, the socket shall be installed at a position greater than 19-11/16"(500mm) from the bathtub.

●Do not touch the power socket with wet hands, **Otherwise it may cause electric shock.**

●Do not pour water, hot water or detergent onto the top of the Electric bidet seat, power supply or plug.

●Make sure the Electric bidet seat is away from flames or combustibles.

●Do not put your fingers or anything at the outlet of the heater, **Otherwise it may cause burns or electric shock.**

●Do not excessively pull or bend the cable. If there is any damage to the cable or plug, cut off the power supply. Use the cable provided by ANZZI for replacement.

●Do not bend or squeeze the water inlet hose, **Otherwise it may lead to water leakage or reduce the water inlet pressure.**

●When power failure occurs during cleaning and the nozzle is not reset, do not push it back by hand. The nozzle will reset itself after the power supply is restored.

●If your ENVO Electric Bidet Seat has the following problems, please stop using it. Turn off power supply and supply stop.

——Pipe, hose or product leaks.

——Product breakage.

——The product has abnormal sound or peculiar smell.

——Smoke from the product.

●Do not use while bathing.

Do not place or store product where it can fall or be pulled into a tub or sink.

Do not place in or drop into water or other liquid.

Do not reach for a product that has fallen into water. Unplug immediately.

Product contains strong magnets — people fitted with pacemakers or other auxiliary equipment should not use.

SAFETY PRECAUTIONS

ATTENTION

- If you are not sure whether the product has been correctly grounded, please find a qualified electrician or sales and service personnel to check and confirm and make sure the power supply provides the matching voltage and power required by the product.

- Review all local plumbing and building codes related to products.

- The water supply pipe must be at least 1/2" copper pipe to provide the optimum flow for the normal operation of the product.

- Carefully check the new Electric bidet seat for damage.

- Use the water inlet hose supplied with the product.

- Do not stand on the Electric Bidet Seat or place any heavy objects on your Electric Bidet Seat. Otherwise, it may be damaged and cause personal injury or water leaks.

- Don't expose the seat to the sun. Otherwise the product may turn yellow or fade.

- Do not install Electric Bidet Seat on moving vehicles such as RVs or boats.

- Don't lean against the Bidet Seat lid.

- When children, the elderly or disabled people use this Bidet Seat, they need to pay close attention. Adjust the appropriate seat temperature for the people mentioned above, as well as for people having skin allergies.

- Do not use this Electric Bidet Seat when you are sleepy.

- Beware of low-grade burns. When sitting for a long time on the Bidet Seat, switch the Bidet Seat temperature adjustment to "OFF". When any of the following persons use a heated seat or warm air drying, someone should switch the Bidet Seat temperature adjustment to "OFF" and switch the drying air temperature to "Low".

- Young children, the elderly and other users who are unable set the temperature appropriately themselves.

- The ill, physically disabled and others who do not have freedom of movement.

- Those using any medicines that cause drowsiness (sleeping medicine or cold medicine), those who have been drinking heavily, anyone severely fatigued and anyone else liable to fall asleep.

- The Electric Bidet Seat requires fresh water only.

- Clean this product with a clean soft cloth. Do not use any abrasive detergent to clean this product.

- Always unplug the plug from the outlet before removing the main unit.

- Any replacement of parts must only be performed by qualified service personnel.

- When the ambient temperature is freezing or if you are not using the Electric Bidet Seat over an extended period of time, drain the water out of it and turn the supply stop off and pull the electrical plug from the outlet.

NOTE: ENVO does not assume any responsibility for the losses caused by the improper installation and actions listed above or other improper operations.

ELECTRIC BIDET SEAT INSTALLATION

Size requirements of adapter cover

- A.Distance from water tank to the front of toilet: 20-21" (505-535mm).
- B.Distance from mounting holes to the back edge of toilet bowl: <2.75" (70mm).
- C.Spacing between two mounting holes: 4.64-7.16" (118-182mm).
- D.Distance from mounting hole to water tank: >1.18" (30mm).

Preparation before installation

Before installing the Electric Bidet Seat:

1. Remove the existing toilet seat and turn off the water supply system of the toilet.
2. Press the flush button to release the pressure from the water supply pipe.
3. Place a container under the inlet valve to catch the excess water.
4. Close the water inlet angle valve and disconnect the connection between the water inlet valve of the toilet and the water supply pipe.

CAUTION: When determining the outlet position of the circuit, it is necessary to follow the local standards.

Install circuit outlet:

1. Before installation, please install a power socket within one yard on the right side of the toilet.
2. It is recommended to use a waterproof socket instead of extension cord connection products.

All ceramic toilet body outline drawings in this manual are for demonstration only.

Install the fixing plate

Fixing plate groove

1. Install the expansion bolt into the mounting holes of the ceramic toilet body.
2. Place the fixing plate above the mounting holes of the ceramic toilet body.
3. Thread the bolt into the long hole of the adjusting block.
4. Place the adjusting blocks in the grooves on either side of the fixing plate. Use the installation template to position the fixing plate. Lock the adjusting blocks to the fixing plate with the bolts.

Install the Electric Bidet Seat

Fixing plate

Align the bottom of the Electric Bidet Seat with the direction of the fixing plate, and push the seat in the direction of the arrow.

When you hear the "click" sound, it indicates that the seat is installed in place.

Installation tip:

Tighten the fixing plate to 70% at first, install the bidet seat, adjust the position, then press and hold the push rod to remove the bidet seat, finish tightening the bolts of the fixing plate and finally install the Bidet Seat.

Power and water supply

Connect the water supply

Connect the external water source to the water inlet with the equipped hose and filter screen.

CAUTION

The plug must be connected to an effectively grounded socket. Otherwise, electric shock may result in the case of power failure or leakage.

Turn on electricity

1. Install 120V (more than 10A) socket at a position above 19.7" (50cm) from the ground.
2. The socket should be installed in a location where it will not be splashed with water.
3. Use a grounded socket.
4. Insert the power plug of the product into the socket.

WARNING!

Please connect the power supply according to the product power supply requirements, otherwise it may cause product fault.

Remote control installation

Adhesive sticker

Installation method

1. Remove the EVA adhesive sticker on the back of the remote control base.
2. Install the remote control base to the verified position.
3. After the base is installed, put the remote control on the base.

Alternative installation method

1. Use a pencil to mark location for two holes on wall, then, drill two expansion pipe holes with diameter of 6mm on the wall and insert the anchors.
2. Install the remote control base and fix it with screws.
3. After the base is installed, put the remote control on the base.

GUIDELINES FOR FIRST USE

Open valve

Open the inlet valve to restore water flow to the toilet.

1. Check power supply.

Confirm that the power plug is plugged in tightly and the indicator light on the plug is on, indicating that the system has been powered on. If the indicator light is not on, you can press the "reset" button on the plug to power on. After power on, you can hear the "tick" sound of the system buzzer.

2. Human-body seating sensor

In the area shown in the figure, there is a seat sensor embedded in the product. The system functions can be enabled only when the system senses that someone is seated.

3. Check basic functions

When the human body seating sensing is on, Turn the knob to "  " or "  " to start the function.

4. Check the drying function

When the human body seating sensing is on, press the "  " button on remote control to start the function.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference, and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

OPERATION INSTRUCTIONS FOR SIDE KNOB

Control Knob

When user is sitting on the seat:
Turn backward to start Rear Wash.
Turn forward to start Female Wash.
Press for two seconds to start Power Wash.

During washing:
Turn knob forward to increase washing pressure and turn
backward to reduce pressure.
Press knob to stop and return to standby state.

In standby state:
Press knob to start or stop Air Drying.

Water Temperature Button

Press the button to adjust the water temperature,
the indicator will show the water temp in 4 levels.
(dim, green, yellow, red)

During washing:
Press for three seconds to turn ON / OFF moving wash function.

Seat Temperature Button

Press the button to adjust the seat temperature,
the indicator will show the seat temp in 4 levels.
(dim, green, yellow, red)

Auto Temperature:

Press for three seconds to turn ON (1 Beep) / OFF (2 Beeps) Auto Temperature function.
If this function is ON, the seat temperature will auto adjust according to indoor temperature, and
cannot be adjusted manually.

Temp

REMOTE CONTROL INSTRUCTIONS

This remote is suitable for TL-AZEB107VWH/UWH

This remote is suitable for TL-AZEB106VWH/UWH

How to use

Stop	Press the stop button to deactivate “rear wash”, “female wash”, “air drying” and “pulse wash” functions.
Rear Wash	Press the Rear Wash button when user is sitting on the seat and bidet will start rear wash for 90 seconds, If the person leaves the seat while the function is running, the function will be stopped.
Female Wash	Press the Female Wash button when user is sitting on the seat and bidet will start female wash for 90 seconds, If the person leaves the seat while the function is running, the function will be stopped.
Power Wash	Press the Power Wash button when user is sitting on the seat and bidet will start power wash for 90 seconds, If the person leaves the seat while the function is running, the function will be stopped.
Water temperature	Press the water temperature button to adjust the water temperature in the "rear wash" and "female wash" modes.
Seat temperature	Press the Seat Temperature button to change the temperature of the seat.
Water Pressure	Press the Water Pressure +/- button to change the water pressure in "rear wash" and "female wash" modes.

How to use

Lid open/close	Press the lid open/close button to open the toilet lid, and then press the button again to close it. Press for 3 seconds to start or stop the auto lid open/close function. (Auto lid open/close feature only applicable to TL-AZEB107VWH/UWH models.)
Recommended mode	Press the recommended mode to use the preset setting.
User mode	Press the user button for 2 seconds to set in memory the current water temperature, air temperature, seat temperature, nozzle position and water pressure. Press the user button to use the memory setting.
ECO	Press the ECO button to start power-saving function (the buzzer rings once); press the button again to stop the power-saving function (the buzzer rings twice for a short time). The seat temp will be 82°F in the ECO mode.
Nozzle cleaning	Press the nozzle cleaning button, and the nozzle will come out. Then the cleaning jet will spray water to clean the nozzle for 10 seconds. Press stop button to stop it when it is running.
Massage Wash	When the "rear wash" or "female wash" function is started, press the massage button to start or stop the massage function. The water temperature changes alternately from 90-100°F.
Air Drying	Press the Air Drying button when user is sitting on the seat and bidet will start air drying for 3 minutes. If the person leaves the seat while the function is running, the function will be stopped.
Air Temperature	Press the Air Temperature button to change the air temperature in "air drying" modes.
Night Light	Turn on or turn off the night light of the control knob.
Nozzle Position	Press the Nozzle Position button to move the nozzle position in the "rear wash" and "female wash" modes.
Code Matching	Unplug the electrical cord, press and hold the "Female Wash" button for 3 seconds. At this time the three LED indicators on the remote will flash red, then plug the electrical cord again.

CLEANING & MAINTENANCE

Product Cleaning

1. Turn off power

Unplug the power plug before cleaning the product.

2. Nozzle Cleaning

Press the "Nozzle Cleaning" button on the remote control, and the nozzle will automatically come out. Use a soft cloth or soft bristled toothbrush to clean the nozzle. You can also remove the nozzle for cleaning (pull the spray nozzle out straight and do not shake it) .

After cleaning, reinstall the spray nozzle and press the "stop" button, the nozzle will return automatically.

3. Clean the external parts of the product

Clean the product with a soft cloth and neutral detergent. Do not use hydrogen chloride cleaner, thinner, benzene, sandpaper, polishing machines, or other cleaning products.

4. Clean the filter screen

When users feel that the water flow is less than normal during use, they can clean both ends of the filter screen with a brush. The product must be completely separated from the water supply hose during cleaning.

If the product is connected to an external filter, please replace it regularly according to the water quality.

If not in use for an extended period of time

1. Pull the plug out.

2. Close the valve to turn off the water supply to the system.
Remove the water inlet hose from the water inlet valve and drain the water in the hose.

3. Press and hold the push rod in the direction of arrow 1, and then horizontally remove the Bidet Seat in the opposite direction of the water tank (arrow 2).

CAUTION

When using the product after a period of disuse, test to confirm proper operation before use. (refer to the Product Installation section).
