GETTING STARTED

BUILD THE YOUTH PITCHBACK FRAME

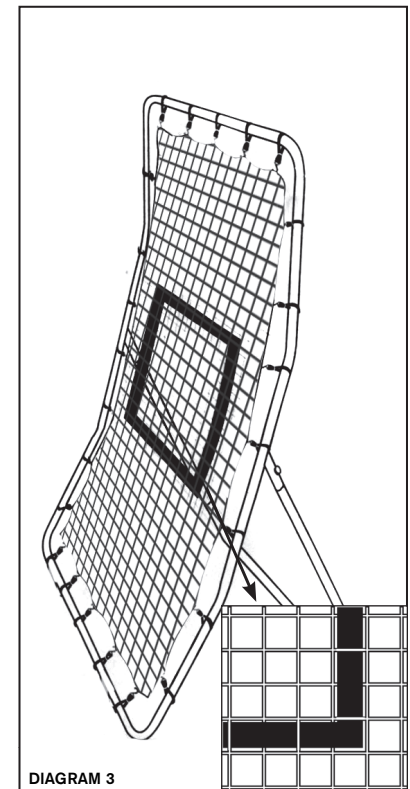

1. Slide 12 Net Hooks (part G) onto one of the L-Shaped Tubes (part A).
2. Then take one of the other two remaining L-shaped Tubes (part A) and slide 5 Net Hooks onto the tube, followed by 1 Ground Stake (part H), 2 more Net Hooks, 1 more Ground Stake and finally 5 more Net Hooks.
3. Follow the illustration in diagram #1 to assemble the rest of the frame (The tube with the Ground Stakes attached will be the base of the frame).

ATTACH THE NET

1. Spread out the Net Hooks (Part G) along the frame, making sure they are all still facing the same way.
2. Attach the net by following the numbered sequence illustrated in diagram #2. Start by taking the Net (Part F) and attaching one of the squares with a red tab to the top left net hook. Skip one net square between the top and side hook and attach the side hook for this corner.
3. Find the square with the other red tab and repeat this procedure for the top right corner.
5. Attach the net to the remaining two corners, making sure that each corner of the net is attached to two net clips.
6. Space the remaining net clips evenly along each side. Attach the net to all remaining net clips.

Note: Study the net clip configuration as shown in diagram #2. This represents the best clip positioning for optimum performance.

ATTACH THE TARGET RIBBON

1. Attach the Red Target Ribbon (Part I) by weaving the ribbon through the net and tying off at the ends. See diagram #3
