

Bed Tilt Sleep System

Versatile Comfort!

The Bed Tilt Sleep System by Lippert Components makes it easy to get comfortable in bed, whether resting, reading or watching TV. With just the flip of a switch, the versatile system inclines the bed to the preferred position. The Bed Tilt can also provide more accessible space, even when the slide room is in. With the bed tilt up, you can easily reach bedroom storage that would otherwise be blocked.

- First adjustable sleep system for RVs
- Adds 18 extra inches of free space when fully inclined
- Utilizes time-tested technology

It can be hard to walk through the RV or access bedroom storage when the slide-out isn't extended.

One button activates the Bed Tilt Sleep System making more room to walk through or reach the dresser.

With the Bed Tilt Sleep System, RVer's can enjoy more floor space and access the dresser, even when the slide-out is not extended.
