

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the number of people, and the y-axis represents the number of people per room. The blue line represents the number of people per room, and the red line represents the number of people. The two lines intersect at the point (5, 5), indicating that when there are 5 people, there are 5 people per room.

LESSON 10

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the number of people, and the y-axis represents the number of people per room. The blue line represents the number of people per room, and the red line represents the number of people. The two lines intersect at the point (5, 5), indicating that when there are 5 people, there are 5 people per room.
