

Batting Gloves made with 3M™ Gripping Material

Get a better
grip
on the game.

The batting glove,
reinvented.

Batting Gloves utilizing 3M™ Gripping Material are much more than ordinary batting gloves: They are *hitting* gloves, designed to bring science to the art of hitting. Comprised of thousands of micro fingers, 3M gripping material greatly enhances traction and grip upon contact with your bat, allowing for better bat control and improved hitting performance.

Take a pair to the plate and feel the difference.

3M

3M™ Gripping Material

Grip it and rip it.

Grip lighter, hold tighter, even in wet conditions.

Successful hitting—whether a softball or baseball—is all about the secureness of the bat while gripping it between your hands.

Strategically placed where glove meets bat, 3M gripping material gives hitters maximum hold with minimum effort. That means more bat feel and control with less fatigue, important for every at-bat.

While typical leather batting gloves and wraps tend to be unpredictable in wet conditions, gloves with 3M gripping material maintain their gripping power and properties even in the rain, especially when the bat is also wrapped with 3M gripping material tape. No sweat. No rainout.

Get our grip, increase your batting performance.

In a study* with NCAA Division II varsity baseball players, bat speed increased 4.4% for players using batting gloves with 3M gripping material compared to leather gloves, which translated into hitting the ball 16.6 feet farther. In a game where even a small improvement in performance can make a huge impact, that extra distance could be the difference between a base hit and a home run.

* Study details can be found at www.3M.com/gripping.

Other performance benefits with 3M™ Gripping Material:

- Helps keep the bat in the hitter's hands and out of the stands
- Eliminates messy, inconsistent, costly pine tar or adhesive sticks; and no more stiff, cracked gloves due to pine tar buildup
- Provides a superior alternative to tackified batting gloves, which lose their effectiveness with time and usage

3M™ Gripping Material is reinventing gripping in other applications, as well:

PRODUCT USE: All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method of application.

WARRANTY AND LIMITED REMEDY: Unless stated otherwise in 3M's product literature, packaging inserts or product packaging for individual products, 3M warrants that each 3M product meets the applicable specifications at the time 3M ships the product. Individual products may have additional or different warranties as stated on product literature, package inserts or product packages. 3M MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. User is responsible for determining whether the 3M product is fit for a particular purpose and suitable for user's application. If the 3M product is defective within the warranty period, your exclusive remedy and 3M's and seller's sole obligation will be, at 3M's option, to replace the product or refund the purchase price.

LIMITATION OF LIABILITY: Except where prohibited by law, 3M and seller will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.
