# LUXURY SHOWER SOLUTIONS

## THE COMPLETE THERMOSTATIC SHOWER SYSTEM

A shower is the ultimate escape, the place where you can step away and feel rejuvenated each and every day. It's your fresh start, and we can help you make that experience a spa-like luxury, head to toe.

California Faucets has the complete shower solution with innovations at every level, including precision temperature control, state-of-the-art showerheads, handshowers, body sprays and award-winning luxury drains. Like every item in the California Faucets line, our shower fittings are offered in more than 25 decorative finishes, including a world-leading 12 PVD finishes, the most durable finishes available today.

California Faucets proudly employs more American labor per faucet sold than nearly every other faucet manufacturer.

## THE SHOWER REVOLUTION STARTS HERE

At the heart of a California Faucets shower is StyleTherm<sup>®</sup>, a revolutionary approach to the thermostatic shower valve.

Most standard shower systems today offer minimal, if any, safety features. Experimenting as you adjust hot and cold water until it feels right, you start the process from scratch with every shower. Bump a handle or flush a toilet and you or your child could be scalded.

Thanks to our innovative engineers, we created StyleTherm, which offers superior showering technology at the same price as many standard valves. These luxury "thermostatic" fittings allow you to set a predetermined temperature and the valve does the rest. No need to fiddle with the handle, balancing hot and cold water each time you shower. StyleTherm makes it easy!

In addition to being a superior fitting, its temperature safety button makes it a much safer alternative than standard valves, especially for children or the elderly. That, we believe, is truly priceless.

Ask your California Faucets dealer to help you compare StyleTherm to other brands. You'll immediately see why StyleTherm is the best shower system, not only in form and function, but safety too.

# STYLETHERM®

It's easy to choose your ideal shower system.

Every California Faucets StyleTherm shower fitting delivers precision temperature control for comfort and safety. And all of them are available for less than an inferior standard technology, such as pressure balance.

As a result, you can now install a safe, precision temperature control fitting in every shower in your home.

Choosing the right one comes down to the style you prefer and the number of shower applications you want to operate. For example, in your master bath, do you want to run the showerhead, a handheld spray and body spray at the same time? Or just two of those? Is it a children's or guest's shower designed with only a single showerhead or a more typical tub/shower combination?

The answer to these questions is important, because StyleTherm's innovative design features independent water volume control for all applications without the need to toggle between them, and they can be configured for virtually any design scenario.

(Shown at right with two integrated volume controls. model #: TO-THF2L-52-SN)

\*StyleTherm versions available to meet even the strictest water conservation codes, including CalGreen.

## FEATURE COMPARISON

	STANDARD PRESSURE BALANCE	STYLETHERM® THERMOSTATIC
Delivers mixed water to showerhead	✓	✓
Easily and accurately sets precise mixed water temperature		✓
Protects against dangerous sudden changes in both water pressure and temperature		✓
Temperature override button prevents inadvertent scalding		✓
Volume control(s) allow you to adjust water flow from low to high		✓
Independent volume controls allows you to operate multiple devices simultaneously		✓

StyleTherm is superior thermostatic technology AND it's available at the cost of inferior shower systems. Why settle for less? StyleTherm is the ONLY solution.

## CUSTOMIZE YOUR SHOWER

California Faucets is known for its Custom Faucetry® and our shower program is no different. That means we give you the ability to design exactly what you want with choices you can't find anywhere else.

Once you've chosen from a variety of components, styles and finishes, we hand assemble your shower fittings specifically for you.

## 1/2" Integrated Two-Way Diverter & Single Integral Volume Control

A two-outlet valve that allows for installation of multiple showering devices while still meeting stringent conservation requirements. This valve creates a myriad of shower configurations, such as a showerhead, handshower, and tub spout or two showerheads combined with a handshower, for the ultimate in showering freedom.

*Ideal for secondary bathrooms with a tub and the desire for both a showerhead and handshower.*

## 1/2" Integrated Two-Way Diverter

With the addition of a diverter, this StyleTherm model meets stringent water conservation standards, including the most demanding of them all, the California Green Building Standards Code (CALGreen). In fact, it's the first thermostatic fitting that does.

But don't think of it as a water-conservation fitting. It's simply a StyleTherm model that accommodates two applications for those who use only one application at a time. Just toggle between applications. And while pressure balance systems only allow water flow that's all on or all off, StyleTherm gives you volume control for each device.

Ideal for secondary bathrooms with a compact, single-use shower or showers subject to water-conservation standards.

## 3/4" Thermostatic System

Ideal for your luxury master bath, this model accommodates multiple shower applications simultaneously, each with its own independent volume control.

You can enjoy a rain showerhead, body spray and hand-held spray all at once, two at once or just one. It offers the greatest flexibility and allows you to create an ideal, customized shower experience.

*Ideal for luxury master bathroom showers with a variety of shower applications installed. Volume control handles on the wall control water flow for separate applications.*

# STYLEDRAIN®

California Faucets was the first company in the United States to create and introduce luxury shower drains to the American market. Our creation, StyleDrain, became the first decorative shower drain system of its kind.

Made of solid, forged brass, this patented design features over 25 custom finishes to match any fitting. With no visible screws, it's easy on the eyes and feet. Don't settle for cheap imitations. StyleDrain is the award-winning original.

# FREE STANDING TUB FILLERS

Providing exceptional design flexibility, our tub fillers give you the option of mixing and matching handle options, ranging from contemporary and transitional to traditional styles. As always, each of our series are available in over 25 decorative finishes, to create the largest, most personalized selection of tub fillers in the world.

With our tub fillers available in deck-mounted, wall-mounted, and freestanding styles, we have something for everyone.

California Faucet's Single Handle Tub Filler has a high flow rate at an extraordinary 10 GPM. Experience a deluge of water as your tub quickly fills with steaming hot water. Our signature solid brass construction, high-quality ceramic cartridge, and built-in stainless steel connections offer long-lasting durability and easy installation.

closed position

ZeroDrain has won international awards including interior design magazine's best of year award, making the other tub drains obsolete

# From Our Hands to Your Home

Artisan Hands, not mass produced, is the very essence of our company's innovative heritage and brand philosophy.

Our faucets are hand crafted one-at-a-time because you're one-of-a-kind. In a world of the mass-produced, "one-size-fits-all," California Faucets offers fittings that fit you. No matter which of our products you choose, you're assured that each is made-to-order and customized as you like. Using materials sourced to stand the test of time, then artisan finished and assembled by hand in our Huntington Beach factory, every California Faucets product is unique. Just like you.

We value custom craftsmanship and do not mass-produce. Our factory artisans proudly design, engineer, finish, and assemble your faucet in our Huntington Beach, California factory.

# FINISHES

**PVD** (Physical Vapor Deposition) finishes come with a lifetime guarantee against tarnishing. Super-hard and molecularly bonded, PVD is by far the most durable finish available.

**LF** (Living Finishes) are created by artisan hands to uniquely age and change over time. Because they are more delicate by nature, please make sure to follow our living finish care instructions.
