

# CONNECTORS AND ADAPTORS

Dynarex Resp-O<sub>2</sub>™ Connectors and Adaptors are engineered to provide improved adaptability and connectivity for use in a broad range of respiratory therapy applications—including oxygen therapy, aerosol therapy, and ventilation. These high-quality devices are manufactured from top-grade plastic materials for optimal durability and dependability. Individual models include features such as swivel, cuffed, or barbed designs for added adaptability for multiple connections.

- Designed to optimize connectivity for a variety of respiratory therapy applications
- Engineered from premium plastic materials for optimal reliability
- Translucent design for optimal visibility
- Not made with natural rubber latex or DEHP
