

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the number of people, and the y-axis represents the number of people per room. The solid line represents the number of people per room, and the dashed line represents the number of people. The number of people per room decreases as the number of people increases, following a downward-sloping curve.

QUESTION

The diagram shows a person sitting at a desk with a computer monitor. The person is looking at the monitor. The monitor displays a graph with a blue bar and a red bar. The blue bar is taller than the red bar. The person is holding a pen and looking at the graph.
