CONCLUSIONS

The study shows a clear upward trend in the number of cases from 1990 to 2030. The data is presented in two tables, both showing a linear increase of 5 units per year. The first table covers the period from 1990 to 2025, and the second table covers the period from 1990 to 2030. The total number of cases in 2030 is 210.
