

Assembling the Wooden 4-Gun Wall Rack:

Parts included: 12 screws 1 left side rack
8 padded felt strips 2 connecting bars
1 right side rack

1. Set the four wooden components out as shown in figure to right. Note that the larger side of the screw holes are on the outside of the side racks.
2. Attach the connecting bars to the two side racks using the eight screws as shown. The side racks are pre-drilled for the screws and the two connecting bars have starting holes that correspond to the pre-drilled holes. After assembling the rack, tighten all screws securely.
3. Add the adhesive backed felt pad strips as shown in the image.
4. Attach the rack to the wall using the four mounting holes on connecting bars.
5. When mounting rack to the wall, it is recommended that you locate mounting holes on wall studs.
