Important Information About This Paint

- The paint included is a specially formulated non-toxic acrylic paint that dries permanently on most surfaces, so be careful.
- Paint may stain clothing, fabric and other surfaces. Wear old clothes and cover your work area.
- Clean up any spills while paint is still wet.
- Save any leftover paint to touch up your designs.
- Seek adult permission before displaying your window art. Do not apply the window art to wood, fabric, painted surfaces etc... place them on a clean window.
- Sun and other temperature conditions may cause your designs to fade over time.
- Adults can remove any paint or foam adhesive residue using window cleaner as needed.

PAINT TECHNIQUES

Plan out your design before you begin. Use the larger tubes of paint for covering larger areas of your designs. The smaller paint tube can be used for accents. Refer to the pictures on the box for ideas. Be sure the foam outline is securely adhered to the plastic backer. **For best results, start with the sprinkle areas first.**

But First - Sprinkles!

- **Decide where you want to add the foam sprinkles.** For ideas refer to the pictures on the box.
- **First, fill in only those areas with paint;** that way you can control the placement of your sprinkles.
- **Cut the corner of the sprinkle bag. Slowly shake the sprinkles over the wet paint.**
- **Once the sprinkles are in place, gently tip the window art over to remove the extra sprinkles.** Do not hold it upside down or sideways for too long or the paint might drip.

Paint

Use a thin coat at first to make sure you don't run out of paint. Once the window art is finished, you can go back to add more paint as needed.

Squeeze out the paint, filling in each section of your designs so no clear areas remain. Use the tip of the tube to move the paint around. You can also use the

PRO TIP: Use a toothpick to move the sprinkles around as needed.

tip of your nozzle to pop any air bubbles as needed. Be sure to cover all inside edges so the paint forms a seal against the foam outline. You can decorate the top of the foil with your window paint. Any unwanted paint can be wiped off before it dries.

Set your designs aside to dry (at least 24 hrs.) Hold your design up to the light to see any areas that need more paint. Be sure the inside edges of foil are covered. Add a second coat of paint where needed.

PRO TIP: If you are running out of paint, use a toothpick to mix colors. A little yellow, blue, pink or green added to the white paint will make a pretty pastel shade.

RHINESTONES AND WIGGLY EYE ACCENTS

Be sure paint is dry before proceeding. To attach the rhinestones and wiggly eyes add a dot of paint to your designs and press them into place. Set them aside until completely dry. You can also use paint to add extra details to your window art once it has dried.

TO MAKE A PASTEL BLUE CLOUD

Use a toothpick or paint brush to mix a little blue into the white paint to make a pretty pastel color.

PRO TIP: To keep your paints from drying out, always replace the caps when not in use.
