

OL8KRTHD | SMART APP ONLINE UPS SYSTEM

Safeguard mission-critical servers, applications, and network equipment with this space saving design and double-conversion power protection

The CyberPower Smart App Online OL8KRTHD high-density design offers more power in less space. In fact, it can be configured into 4U of rack space or as a tower, compared to 6U for similar competitive UPS models – giving you more room to grow. The OL8KRTHD features double-conversion topology for seamless power protection and a pre-installed RMCARD205.

For monitoring, this UPS offers a new state-of-the-art, multi-function, color matrix LCD screen that is simple to set up and easy to use. The color-coded alerts provide clear status of the UPS and the screen orientation rotates automatically when placed into a tower configuration.

The OL8KRTHD ensures maximum efficiency and capacity output with a Power Factor rating (PF) of one. The energy-saving GreenPower UPS™ ECO Mode enables up to 98% efficiency while reducing power consumption and thermal dissipation. The variable seven-speed fan provides automatic thermal management, based on power load, to reduce noise.

The optional BP192VL2U01 Extended Battery Module (EBM) expands runtime and up to ten EBMs can be connected in a daisy-chain to the UPS for more backup power. Plus, it's all backed by a three-year warranty (including batteries) and a \$300,000 Connected Equipment Guarantee.
