

ROTA-FLEX[®]

BY Trailair[®]

Enhance Your Towing Experience!

From the same minds at Trailair[®] who brought you the Air Ride Pin Box[™] and the Equa-Flex[®] rubberized equalizer, comes Rota-Flex, a rubberized and pivoting pin box designed to enhance and smooth your ride. You've put a lot into your investment, so protect it with Rota-Flex!

rubber compound absorbs vibration

Your Ride Just Got Smoother!

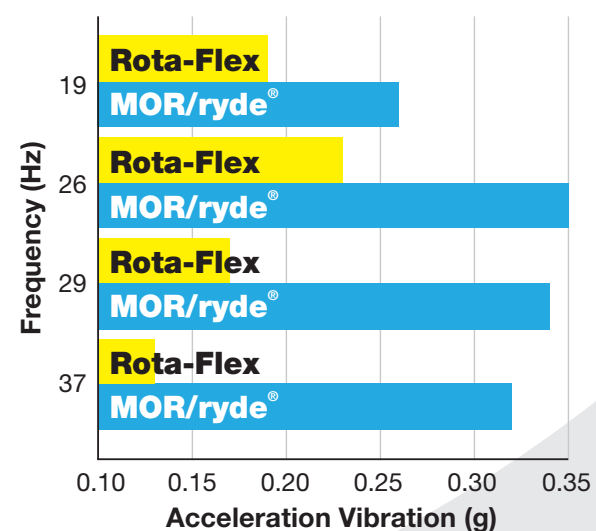

Making it Smooth

The Rota-Flex Pin Box pivoting head significantly reduces fore to aft coach movement otherwise known as chucking. The rubber compound inside the pin box head assembly absorbs road shock and vibrations so your ride is more comfortable.

QUICK FACTS

- Created by Trailair, the same minds who brought you Equa-Flex and the Air Ride Pin Box
- Absorbs road shock that would otherwise be absorbed by your RV, preventing costly damage
- Pivoting head controls fore to aft movement of the kingpin to further control chucking
- Rubberized torsion compound in the pin box head absorbs motion and vibration caused by road shock
- Significantly reduces fore to aft coach movement otherwise known as chucking
- New 21K model allows for larger toy hauler applications
- Made in the USA!

Rota-Flex vs. MOR/ryde[®] Pin Boxes Accelerated Frame Chatter

Independent testing was performed by Bosch Automotive at their proving grounds in New Carlisle, Indiana. Event speed: 15 mph.

MOR/ryde is a registered trademark of MOR/ryde International.
