

The coordinates of the point are (x, y, z) .
 The distance from the origin to the point is $\sqrt{x^2 + y^2 + z^2}$.
 The projection of the point on the xy -plane is $(x, y, 0)$.
 The distance from the origin to the projection is $\sqrt{x^2 + y^2}$.
 The distance from the projection to the point is z .

QUESTION

The coordinates of the point are (x, y, z) .
 The distance from the origin to the point is $\sqrt{x^2 + y^2 + z^2}$.
 The projection of the point on the xy -plane is $(x, y, 0)$.
 The distance from the origin to the projection is $\sqrt{x^2 + y^2}$.
 The distance from the projection to the point is z .

Answer: $\sqrt{x^2 + y^2 + z^2}$
