

Example 1

Find the area of the top face.

Length = 10 units, width = 5 units

$$\text{Area} = \text{length} \times \text{width}$$

$$= 10 \times 5$$

$$= 50$$

Area = 50

The area of the top face is 50 square units.

Length = 10 units, width = 5 units

$$\text{Area} = \text{length} \times \text{width}$$

$$= 10 \times 5$$

$$= 50$$

Area = 50

The area of the top face is 50 square units.

Find the area of the bottom face.

Length = 10 units, width = 5 units

$$\text{Area} = \text{length} \times \text{width}$$

$$= 10 \times 5$$

$$= 50$$

Area = 50

The area of the bottom face is 50 square units.

Length = 10 units, width = 5 units

$$\text{Area} = \text{length} \times \text{width}$$

$$= 10 \times 5$$

$$= 50$$

Area = 50

The area of the bottom face is 50 square units.

Example 2

Find the area of the top face.

Length = 10 units, width = 5 units

$$\text{Area} = \text{length} \times \text{width}$$

$$= 10 \times 5$$

$$= 50$$

Area = 50

The area of the top face is 50 square units.

Example 3

Find the area of the bottom face.

Length = 10 units, width = 5 units

$$\text{Area} = \text{length} \times \text{width}$$

$$= 10 \times 5$$

$$= 50$$

Area = 50

The area of the bottom face is 50 square units.
