Set airflow rate

Using the wire controller to set airflow rate
(some models)

When the air conditioning unit is off, perform the following steps:

- ① Press "MODE" and "FAN" for three seconds.
- ② Press "△" or "▽" to select the SP.
- ③ Press "MODE" to set the airflow rate in the range of 0~4.

"0": No airflow change
"1"~"4": Airflow increase progressively

- ④ Press "ON/OFF" to finish the airflow setting.
