

TABLE-TOP WIRELESS CHARGING & MOUNTING SYSTEM.

IPOINT Charge Case & Stand system is a slim case that docks and charges iPad wirelessly with a small table-top stand. Drop the Charge Case onto the Stand and charge effortlessly in portrait or landscape orientations with magnets that align charging pins automatically.

Charge Case also grants you access to all iPad buttons, microphones, cameras and speakers. The Stand takes up as much space on a table as a coffee cup, preserving counter-space in a kitchen or on a bedside table.

And with 2 USB ports on the Stand, you can charge additional devices alongside the docked iPad. Hold, charge and protect iPad on any table, any time with Charge Case & Stand.
