

### PROPOSAL

1. The proposed project is a study of the effects of climate change on the distribution of species in the tropics. The study will focus on the impact of rising temperatures and changing precipitation patterns on the range and abundance of various species. The research will be conducted in a tropical region where climate change is expected to have significant effects. The study will involve field observations, data collection, and analysis of the relationship between climate variables and species distribution. The results of the study will provide valuable insights into the resilience of tropical ecosystems and the potential for species migration and adaptation in the face of climate change.

Item	Quantity	Unit Price	Total Price
Field equipment	1	\$10,000	\$10,000
Travel expenses	1	\$5,000	\$5,000
Salaries	1	\$20,000	\$20,000
Materials	1	\$2,000	\$2,000
Analysis fees	1	\$3,000	\$3,000
Publication costs	1	\$1,000	\$1,000
<b>Total</b>			<b>\$41,000</b>
