

Figure 10

Figure 10 shows the following:

1. The structure of the system is a rectangular frame with a central vertical column and a horizontal beam.

2. The central vertical column is supported by a base and has a horizontal beam attached to its top.

3. The horizontal beam is supported by a vertical column on the right side.

4. The horizontal beam is supported by a vertical column on the left side.

5. The horizontal beam is supported by a vertical column on the right side.

6. The horizontal beam is supported by a vertical column on the left side.

7. The horizontal beam is supported by a vertical column on the right side.

8. The horizontal beam is supported by a vertical column on the left side.

9. The horizontal beam is supported by a vertical column on the right side.

10. The horizontal beam is supported by a vertical column on the left side.

11. The horizontal beam is supported by a vertical column on the right side.

12. The horizontal beam is supported by a vertical column on the left side.

13. The horizontal beam is supported by a vertical column on the right side.

14. The horizontal beam is supported by a vertical column on the left side.

15. The horizontal beam is supported by a vertical column on the right side.

16. The horizontal beam is supported by a vertical column on the left side.

17. The horizontal beam is supported by a vertical column on the right side.

18. The horizontal beam is supported by a vertical column on the left side.

19. The horizontal beam is supported by a vertical column on the right side.

20. The horizontal beam is supported by a vertical column on the left side.

21. The horizontal beam is supported by a vertical column on the right side.

22. The horizontal beam is supported by a vertical column on the left side.

23. The horizontal beam is supported by a vertical column on the right side.

24. The horizontal beam is supported by a vertical column on the left side.

25. The horizontal beam is supported by a vertical column on the right side.

26. The horizontal beam is supported by a vertical column on the left side.

27. The horizontal beam is supported by a vertical column on the right side.
