

Spinner Garden Stake

Assembly Instructions

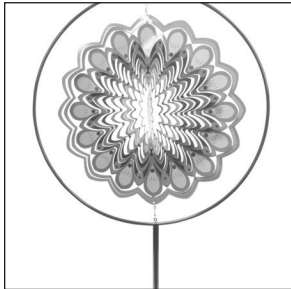

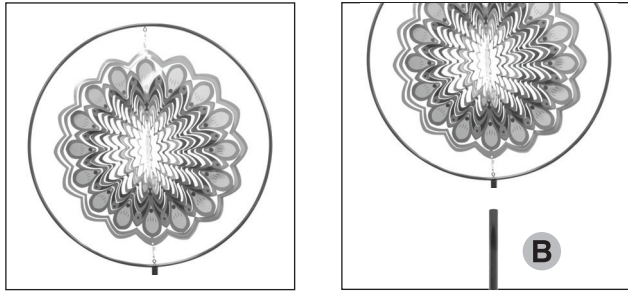

Step 1: Remove metal tabs from spinner by using the wrench (D). A Phillips screwdriver (not included) will be needed to hold the screws in place, while turning the nuts counter clockwise with the wrench (D).

Step 2: Fan out spinner (A) by separating each layer with your fingers. Spinner layers should be spaced out evenly to prevent damage.

Step 3: Attach spinner (the result of step 1) to middle pole (B) by turning it to the right until it is firmly tightened.

Lay Assembly on the ground for the following steps.

Attach middle pole (B) to middle pole (B) by turning it to the right until it is firmly tightened. Then attach middle pole (B) to stake base support (C) by turning it to the right until it is firmly tightened. When everything is assembled, insert stake base firmly into the ground. For best results, install on flat ground and ensure that the stake is 90 degrees vertical to the ground.

Our laser-cut spinners spin with the slightest breeze as the rings catch sunlight and shimmer. The eye-catching spinners come in various designs with stunningly shaped edges, smooth curves, and vibrant colors. The Art in Motion™ spinners are great for your garden.
