SIDNIE PORTABLE LAMP

Assembly Instructions

SIDNIE PORTABLE LAMP

Note:

- REQUIRES NO TOOLS OR WIRING .
- This portable lamp can be used to illuminate your desk, night table, or hallway credenza.
- The light source inside the lamp shade cannot be removed.
- The light source includes an LED, switch, and battery. The battery powers the LED.
- The LED generates 360 lumens and lasts approximately 6.5 hours on full charge.
- There is a charging port at side of the base and an on/off switch underneath the base.

Trouble Shooting:

If the lamp does not work, the batteries may need to be charged. Plug in the lamp with the included cable and power adapter until the LED glows green. Do not position the lamp near a water source. The lamp is designed to be weatherproof, but over time, water may get in and damage the electronics and battery.

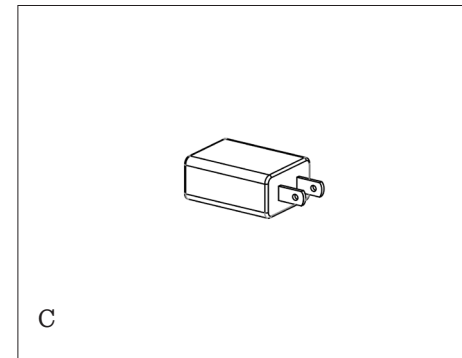

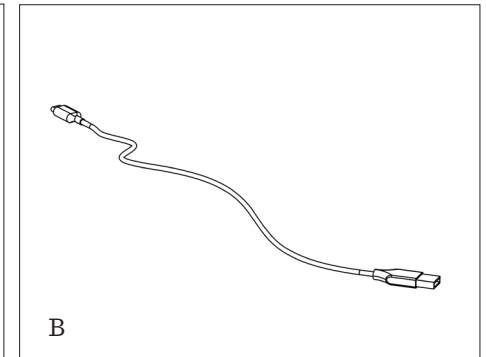

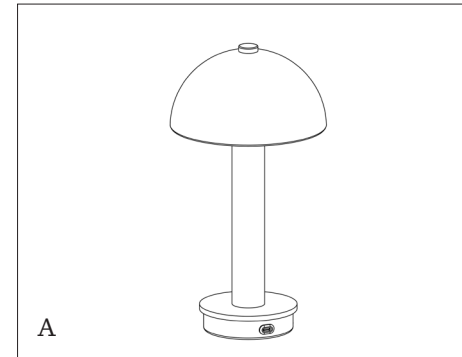

Care Instructions:

Wipe with soft dry cloth. Do not use cleaners that contains strong acid or strong alkaline. Make sure no liquid and small components drop into the charging hole or switch. Keep the product and battery away from prolonged sunlight, heat sources, and flammable objects. Regularly inspect the lamp, cable, and battery for damage. Stop using immediately if they feel hot, emit unusual odors, or show visible damage (e.g., swelling, cracks, leakage). Do not modify the product in any way.

Warning:

- This product is not a toy and has no play value. This product can be used outdoors, except in extreme weather events. Make sure not expose to rain or snow.
- Do not incinerate the battery.
- This product contains a lithium-ion battery. Improper handling may cause fire, explosion, or injury, handle with care.
- Use only the provided charging cable. Cable must be charged in 5V, max 2A adapter.
- Do not leave the product charging unattended. Disconnect the charger once the product is fully charged.
- Always charge the product indoors.

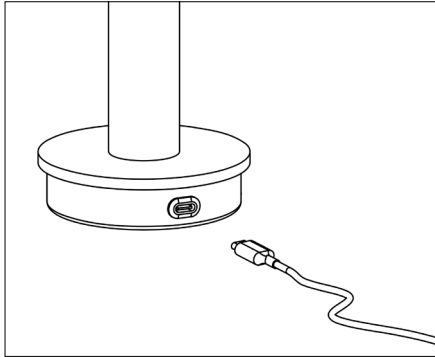

INCLUDED HARDWARE

Required Components:

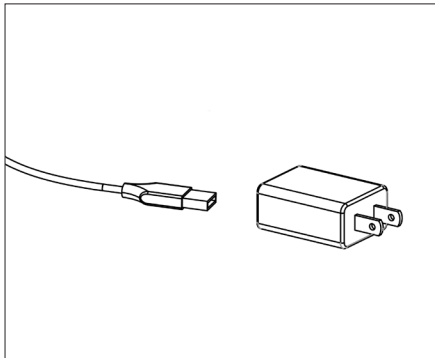

- 1 Lamp Body (A)
- 1 USB Cable (B)
- 1 Power Adapter (C)

INSTALLATION INSTRUCTIONS

1. Plug in type C side of supplied USB Cable (B) into the type C USB port on the base of the Lamp Body (A).

Ensure to only charge Sidnie Portable with supplied USB Cable (B)

2. Plug in type A end of the supplied USB Cable (B) to supplied Power Adapter (A), and plug Power Adapter (A) into a 110V outlet.

Ensure to only charge Sidnie Portable with supplied Power Adapter (A), or a 5V, max 2A Adapter.

3. Rotate lamp and press button to activate led.
A charging indicator around the switch will turn red when charging, and turns green when fully charged. This takes about 2.5 hours.
