

Wake up relaxed and rejuvenated!

Quick Facts

- Cooling gel foam
 - Molds to body in response to heat and pressure
 - Evenly distributes temperature from head to foot
 - Lowers body temperature 2 degrees for better rest
- Dense foam core
 - Supports body along curves to relieve pressure points
 - Reduces energy transfer between sleeping partners
 - Provides complete edge to edge support
- Ultra-soft circular knit fabric offers long-term comfort
- Lightweight – customers can reach under-bed storage
- Residential and special RV sizes available

Gel Foam Technology

Keep cool and comfortable all night with Ocean Blue gel foam technology. Gel foam embraces your body in response to heat and pressure and evenly distributes heat, lowering body temperature up to 2 degrees. Research shows lowering body temperature even 2degrees during sleep can greatly improve a person's rest experience. A dense foam core supports your body to relieve pressure points, reduces motion transfer between sleepers and provides firm edge-to-edge support. The ultra-soft knit fabric top adds an extra layer of luxurious, long-lasting comfort.
