

The area of a triangle is  $\frac{1}{2}bh$ .  
 The area of a square is  $s^2$ .  
 The area of a rectangle is  $lw$ .  
 The area of a parallelogram is  $bh$ .  
 The area of a trapezoid is  $\frac{1}{2}(b_1 + b_2)h$ .  
 The area of a circle is  $\pi r^2$ .  
 The area of a sector is  $\frac{\theta}{360} \pi r^2$ .  
 The area of a segment is  $\frac{1}{2}r^2(\theta - \sin \theta)$ .

## QUESTION

The area of a triangle is  $\frac{1}{2}bh$ .  
 The area of a square is  $s^2$ .  
 The area of a rectangle is  $lw$ .  
 The area of a parallelogram is  $bh$ .  
 The area of a trapezoid is  $\frac{1}{2}(b_1 + b_2)h$ .  
 The area of a circle is  $\pi r^2$ .  
 The area of a sector is  $\frac{\theta}{360} \pi r^2$ .  
 The area of a segment is  $\frac{1}{2}r^2(\theta - \sin \theta)$ .
