

Kinetic Garden Stake

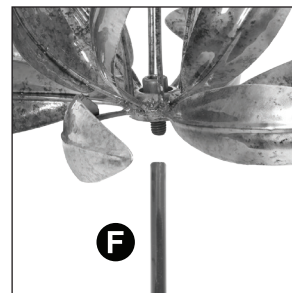

Assembly Instructions

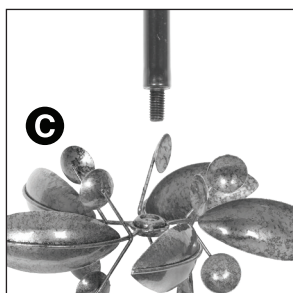

Step 1: Attach nut bolt (A) to flower (B) by sliding nut bolt into flower.

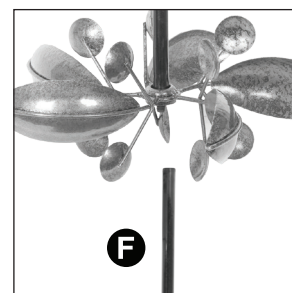

Step 2: Attach top pole (F) to nut bolt (A) (the result of step 1) by turning it to the right until it is firmly tightened. **Note:** Use allen wrench (J) to hold nut bolt in place.

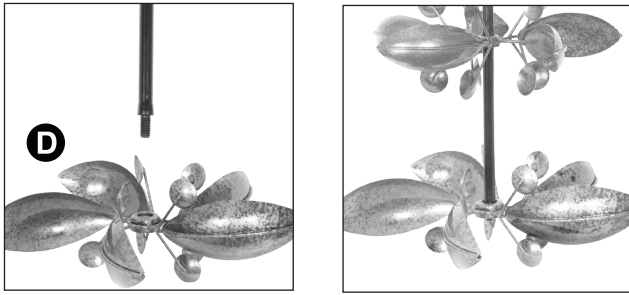

Step 3: Attach small spinner (C) to top pole (F) (the result of step 2) by sliding small spinner into top pole.

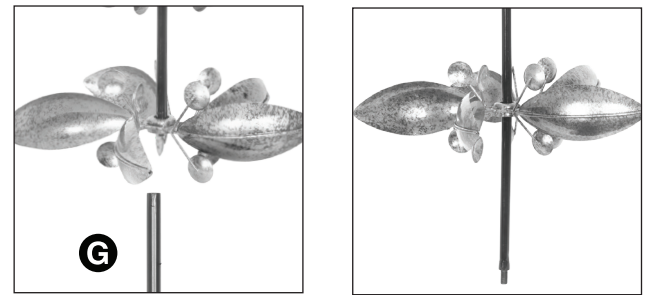

Step 4: Attach top pole (F) to top pole (F) (the result of step 3) by turning it to the right until it is firmly tightened.

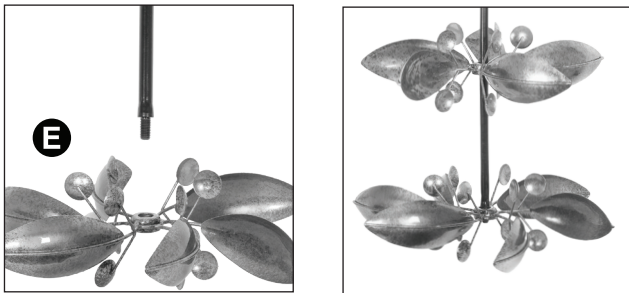

Step 5: Attach medium spinner (D) to top pole (F) (the result of step 4) by sliding medium spinner into middle pole.

Step 6: Attach middle pole (G) to top pole (F) (the result of step 5) by turning it to the right until it is firmly tightened.

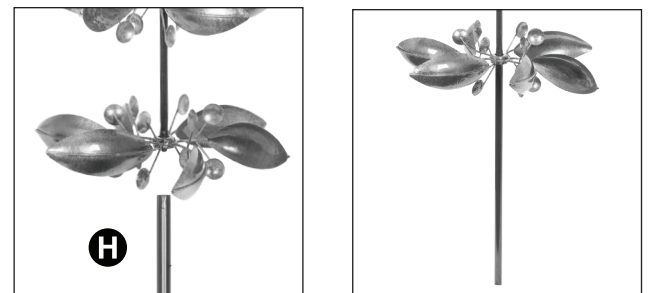

Step 7: Attach large spinner (E) to middle pole (G) (the result of step 6) by sliding large spinner into middle pole.

Lay Assembly on the ground for the following steps.

Step 8: Attach bottom pole (H) to middle pole (G) (the result of step 7) by turning it to the right until it is firmly tightened.

Step 9: Slide the stake support (I) into the stake base (J) by pushing the button on stake base in. Then insert stake base (J) into the bottom of bottom pole (H) by aligning the button on stake base with the hole on bottom pole until it clicks into place. When everything is assembled, insert stake base firmly into the ground. For best results, install on flat ground and ensure that the stake is 90 degrees vertical to the ground.
