Ages 5 to 95

# MAGIC BEAN GARDEN

Decorate your pot, plant your beans and get ready for a little gardening magic. In a few days, your beans will sprout to reveal your secret messages!

## Important Information about this paint

- The paint included is a specially formulated non-toxic, ceramic paint that dries permanently on most surfaces, so be careful!
- Cover your work surface with newspaper. Have a cup of water and paper towels handy.
- Wear a smock or old clothes. This paint may stain fabrics and other surfaces. Clean up any spills immediately while the paint is still wet.
- Paint can settle and separate over time. Mix each color thoroughly before you begin painting. If the paint seems too thick, stir in a drop or two of water.
- Before changing colors, rinse and dry your brush thoroughly.

## PAINT AND DECORATE

Paint your flower pot however you'd like. Refer to the package for design ideas.

### Pro-Tips:

- Apply two coats of paint to make them brighter.
- Use a paper plate as a mixing palette.
- To create small dots, use the handle of your paint brush.

Mix Colors

Set the pot aside to dry completely. Drying times may vary.

# PLANT AND GROW

For best results plant only 1 or 2 beans at a time. Save the other bean(s) to plant later.

1) Place the flower pot on the plastic saucer. Fill the pot with the potting mix.

2) Make a wish as you plant your beans. Place them in the potting mix until the mix just covers them. Make sure to leave at least an inch between the beans.

3) Water your beans until excess water drains from the bottom of the pot. Keep the bean lightly covered with potting mix until it sprouts. Do not add water again until growth appears (3-10 days), or if the potting mix feels very dry. **Over-watering may cause rotting.**

4) Once your bean(s) begin to sprout, decorate around them with the colorful garden pebbles.

## WARNING:

Beans are for planting only. Do not place them near your nose or mouth. Do not eat.

# ROUTINE CARE

1) Place in a sunny window that receives at least a half day of sunlight. **Lack of sunlight may cause plant to wilt or grow poorly.**

2) Ideal temperature for growing is between 60°F - 95°F (16°C - 35°C). **Cold conditions may delay sprouting time.**

3) The bean sprout may have a brown shell/skin. Do not attempt to remove it. It will naturally fall off revealing the message engraved on the bean.

4) Growth appears in about 3-10 days revealing the secret message engraved on the bean!

5) After growth appears, water only when surface potting mix is dry.

6) Over time, your magic message will drop off revealing new leaves.

# PLANTING OUTSIDE

Your magic bean plants can be replanted outdoors. With proper care, they will grow even larger. Before planting outdoors, be sure the temperature is above 60°F (16°C). Plant in a sunny spot in rich, freely draining soil. This bean variety is a climber; For best results, plant them near a trellis, fence, cage, or wall.

## FUN FACTS

The "magic" beans included in your garden are also known as Sword Beans (Canavalia beans). They can grow pods 12 - 18" (30 - 46cm) long that look like dangling swords!
