INTRODUCTION

The descriptions contained in this document are not binding.

The company therefore reserves the right to make any modifications at any time to elements, details, or accessory supply, as considered necessary for reasons of improvement or manufacturing/commercial requirements.

The reproduction, even partial, of the text and drawings contained in this document is prohibited by law. The company reserves the right to make any technical and/or supply modifications.

The images are shown as reference only and are not binding as to the actual design and/or equipment.

The spare parts catalogue consists of a series of illustrations and corresponding lists of spare parts.

The illustrations represent the spare parts for each of the MAIN UNITS into which the machine is divided.

These main units, in turn, are divided into FIGURES, and the figures are divided into one or more ILLUSTRATIONS or LISTS.

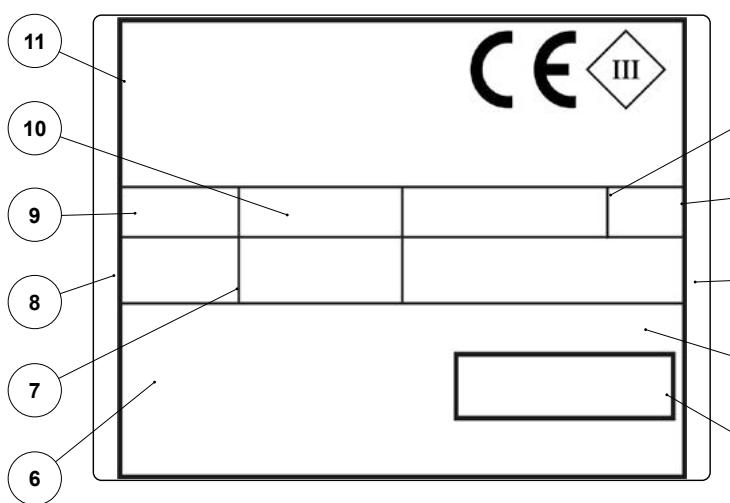

Each illustration is identified by a sequential number, and by the name of the unit that features in the illustration (e.g. CR-01 BRUSH HEAD UNIT).

In the illustration, all the spare parts are identified by a position number.

WARNING: when replacing machine components, we recommend using only ORIGINAL SPARE PARTS. We recommend not waiting until components are worn out through use; replacing a part in a timely manner results in better operation of the machine, and in addition, maintaining an efficient machine also leads to time and cost savings.

SERIAL NUMBER PLATE:

The serial number plate is located on the machine itself, and indicates the general characteristics thereof, specifically the serial number of the machine. The serial number is a very important piece of information and should always be provided together with any request for assistance or to purchase spare parts. The serial number plate contains the following information:

1. The weight of the batteries that power the machine (expressed in kg).
2. The IP protection rating of the machine.
3. The gross weight of the machine (expressed in kg).
4. The machine ID code.
5. The machine serial number.
6. The machine ID name.
7. The nominal power consumed by the machine (expressed in W).
8. The maximum grade that the appliance can handle during work activities (expressed as %).
9. The year of machine manufacture.
10. The nominal voltage of the machine (expressed in V).

11. The commercial name of the machine, and the manufacturer's address.

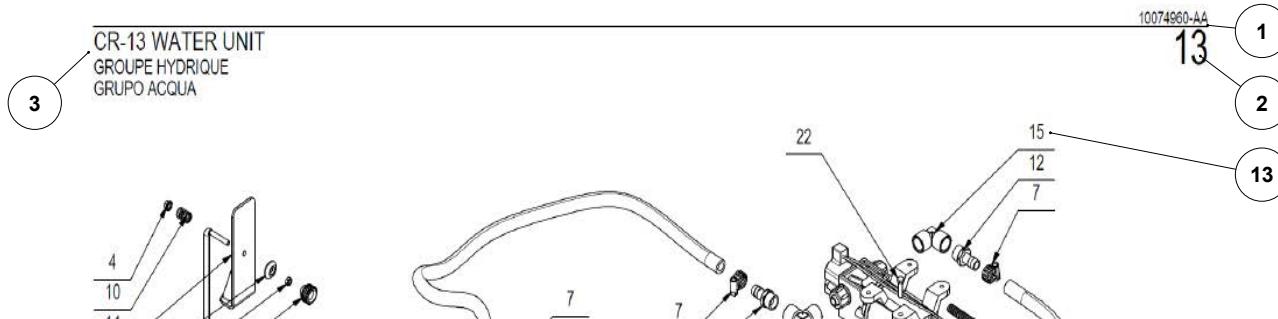

ATTENTION: it is strictly forbidden to remove or tamper with the serial number plate.

HOW TO READ THE SPARE PARTS TABLES

This document contains the spare parts tables.

In order to read these correctly, please refer to the key below:

1. DOCUMENT NUMBER - VERSION: identifies the document number and version of the spare parts table shown.
2. TABLE: identifies the number which represents the main units into which the machine has been divided.
3. NAME: the name used to identify the unit referred to in the spare parts table.

4. DESCRIPCION: identifies the SPANISH language description associated with the spare part in question.
5. DESCRIPTION: identifies the FRENCH language description associated with the spare part in question.
6. DENOMINATION: identifies the ENGLISH language description associated with the spare part in question.
7. DESCRIZIONE: identifies a more detailed ITALIAN language description associated with the spare part in question.
8. Q.TY: identifies the quantity of the spare part used for the unit in the illustration.
9. CODE: identifies the numerical reference used to identify the spare part in question.

10. SERIAL NUMBER: the serial number of the first machine produced with the technical modification reported in the relevant technical news document.
11. TECHNICAL NEWS: the document number for the technical news document in which the technical modification associated with the part is described.
12. _ : the graphic symbol that identifies whether the part in question is an assembly made up of several components, or whether it is a single, stand-alone element.

↓	indicates that the part in question is an assembly made up of several components.
↑	indicates that the part in question is a component in an assembly.
→	indicates that the part in question is valid from the serial number displayed.
←	indicates that the part in question is valid up to the serial number displayed.

13. POS: the position number that identifies the part in the illustration. If the identifying number contains the "." symbol, this represents a part that is a component in an assembly.

CR-13 WATER UNIT

The diagram shows an exploded view of the CR-13 Water Unit. Various parts are labeled with numbers 1 through 13, which correspond to the position numbers in the table below. The parts include a stop ring (1), a handle (2), a body (3), a lock nut (4), a clamp (5), a filter assembly (6), a filter (7), a gasket (8), a cartridge filter (9), a filter cap (10), a lock washer (11), a lock nut (12), and a lock washer (13).

INTRODUCTION

Les descriptions contenues dans cette publication ne sont pas contractuelles.

La société se réserve donc le droit d'apporter, à tout moment, d'éventuelles modifications aux organes, pièces, accessoires qu'elle jugera nécessaires pour une amélioration ou toute autre exigence de caractère constructif ou commercial.

La reproduction même partielle des textes et des dessins contenus dans cette publication est interdite par la loi. La société se réserve le droit d'apporter des modifications à caractère technique et/ou relatives aux équipements.

Les images sont fournies à simple titre d'exemple et ne sont pas contraignantes pour le design et les équipements.

Le catalogue des pièces de rechange se compose d'une série d'illustrations et de listes correspondantes de pièces de rechange.

Les illustrations montrent les pièces de rechange pour chacun des GROUPES PRINCIPAUX dans lesquels la machine a été divisée.

Les groupes principaux sont à leur tour subdivisés en FIGURES et les figures en une ou plusieurs ILLUSTRATIONS ou LISTES.

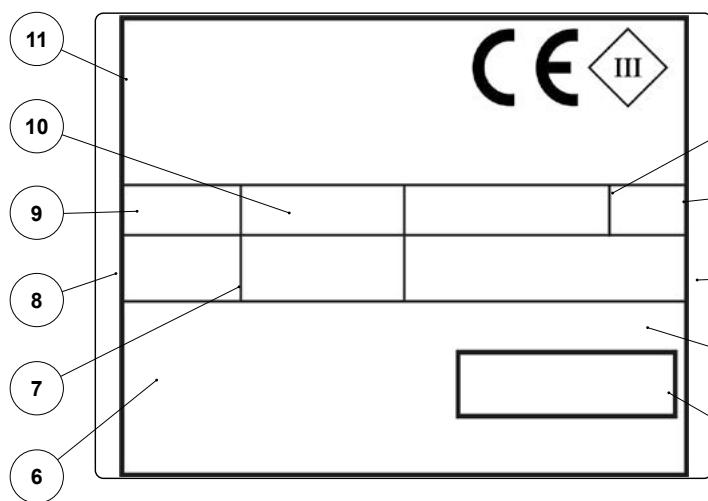

Chaque illustration est identifiée par un numéro séquentiel et le nom du groupe illustré (par ex. CR-01 GROUPE CARTER).

Dans l'illustration, toutes les pièces de rechange sont identifiées par un numéro de position.

AVERTISSEMENT : lors du remplacement des pièces de rechange, il est recommandé d'utiliser uniquement des PIÈCES DE RECHANGE D'ORIGINE. Il est conseillé de ne pas attendre que les composants soient usés par l'utilisation, remplacer un composant au bon moment signifie un meilleur fonctionnement de la machine et en même temps des économies dues au maintien d'une machine efficace.

PLAQUE MATRICULE :

La plaque matricule est positionnée sur la machine, elle indique les caractéristiques générales de la machine, en particulier le numéro de série de la machine. Le numéro de série est une information très importante qui doit toujours être fournie en même temps que toute demande d'assistance ou d'achat de pièces de rechange. Les indications suivantes peuvent être lues dans la plaque signalétique :

1. La valeur exprimée en kg du poids des batteries d'alimentation de la machine.
2. L'indice de protection IP de la machine.
3. La valeur en kg du poids brut de la machine.
4. Le code d'identification de la machine.
5. Le numéro de série de la machine.
6. Le nom d'identification de la machine.
7. La valeur exprimée en W de la puissance nominale absorbée par la machine.
8. La valeur exprimée en % de la pente maximale franchissable lors du travail.
9. L'année de fabrication de la machine.
10. La valeur exprimée en V de la tension nominale de la machine.

11. Le nom commercial et l'adresse du fabricant de la machine.

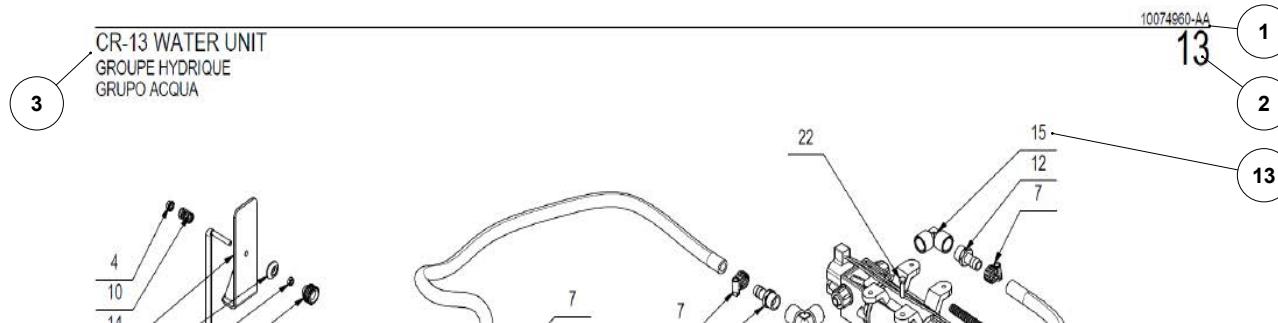

ATTENTION : il est strictement interdit de retirer ou d'altérer la plaque matricule.

COMMANDE LIRE LES TABLES DES PIÈCES DE RECHANGE

Ce document contient les tables des pièces de rechange.

Pour les consulter correctement, lire la légende fournie ci-dessous :

1. NUMÉRO DE DOCUMENT - VERSION : identifie le numéro de document et la version de la table des pièces de rechange représentée.
2. TABLE : identifie le numéro représentatif des groupes principaux dans lesquels la machine a été divisée.
3. NOM : identifie le nom avec lequel est identifié le groupe représenté dans la table des pièces de rechange.

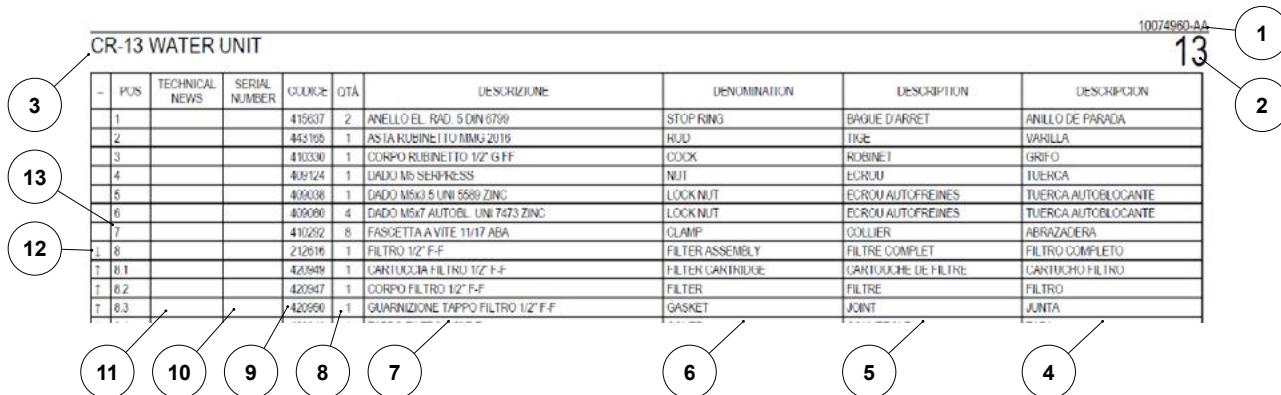

4. DESCRIPCION : identifie la description en espagnol de la pièce de rechange associée.
5. DESCRIPTION : identifie la description en français de la pièce de rechange associée.
6. DENOMINATION : identifie la description en anglais de la pièce de rechange associée.
7. DESCRIZIONE : identifie une description plus détaillée en italien de la pièce de rechange associée.
8. QTÉ : identifie la quantité de la pièce de rechange utilisée pour le groupe illustré.

9. CODE : identifie la référence numérique avec laquelle est identifiée la pièce de rechange associée.
10. NUMÉRO DE SÉRIE : indique le numéro de série de la première machine produite avec la modification technique indiquée dans le bulletin technique associé.
11. BULLETIN TECHNIQUE : indique le numéro de document d'un bulletin technique qui décrit une modification technique associée à la pièce.
12. _: indique le symbole graphique qui permet d'identifier si la pièce associée est un ensemble composé de plusieurs éléments ou s'il s'agit d'un élément individuel.

↓	indique que la pièce associée est un ensemble composé de plusieurs pièces.
↑	indique que la pièce associée fait partie d'un ensemble.
→	indique que la pièce associée est valable à partir du matricule indiqué.
←	indique que la pièce associée est valable jusqu'au matricule indiqué.

13. POS : indique le numéro de position qui identifie la pièce dans l'illustration. Si le numéro d'identification contient le symbole « . » il représente une pièce qui compose un ensemble.

INTRODUCCIÓN

Las descripciones contenidas en esta publicación no se consideran vinculantes.

Por tanto, la empresa se reserva el derecho de aportar en cualquier momento las eventuales modificaciones en piezas, detalles, suministros de accesorios, que considere convenientes para una mejora o debido a cualquier exigencia de carácter constructivo o comercial.

La reproducción, incluso parcial, de los textos o de los diseños de esta publicación, está prohibida por ley. La empresa se reserva el derecho de aportar modificaciones de carácter técnico y/o de equipamiento.

Las imágenes son a título indicativo y no vinculantes en términos de diseño y suministro.

El catálogo de piezas de recambio consta de una serie de ilustraciones y sus correspondientes listas de piezas de repuesto.

Las ilustraciones muestran las piezas de repuesto de cada uno de los GRUPOS PRINCIPALES en los que se ha dividido la máquina.

Los grupos principales se subdividen, a su vez, en FIGURAS y las figuras en una o varias ILUSTRACIONES o LISTAS.

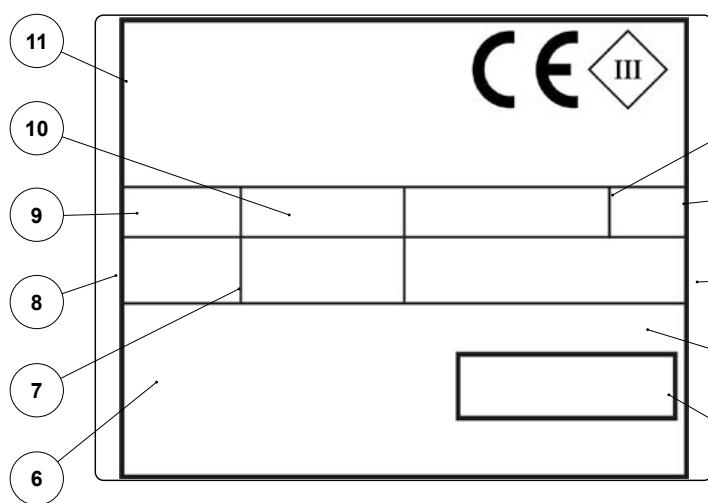

Cada ilustración está identificada por un número secuencial y el nombre del grupo ilustrado (por ej. CR-01 GRUPO BANCADA).

En la ilustración, todas las piezas de repuesto están identificadas con un número de posición.

ADVERTENCIA: cuando se sustituyan las piezas, se recomienda utilizar exclusivamente PIEZAS DE REPUESTO ORIGINALES. Se recomienda no esperar a que los componentes se desgasten por el uso, la sustitución de un componente en el momento adecuado supone un mejor funcionamiento de la máquina y, al mismo tiempo, un ahorro ya que la máquina trabaja en condiciones de funcionamiento óptimas.

PLACA DE LA MATRÍCULA:

La placa de la matrícula está colocada en la máquina y contiene las características generales de la máquina, especialmente el número de serie. El número de serie es una información muy importante que debe comunicarse en cualquier solicitud de asistencia o pedido de compra de piezas de repuesto. En la placa de la matrícula se puede leer la siguiente información:

1. El valor indicado en Kg del peso de las baterías de alimentación de la máquina.
2. El grado de protección IP de la máquina.
3. El valor en Kg del peso bruto de la máquina.
4. El código de identificación de la máquina.
5. El número de serie de la máquina.
6. El nombre de identificación de la máquina.
7. El valor expresado en W de la potencia nominal absorbida de la máquina.
8. El valor de la pendiente máxima que se puede transitar durante la fase de trabajo, expresado en %.
9. El año de fabricación de la máquina.
10. El valor de la tensión nominal de la máquina, expresado en V.
11. El nombre comercial y la dirección del fabricante de la máquina.

- en V.
11. El nombre comercial y la dirección del fabricante de la máquina.

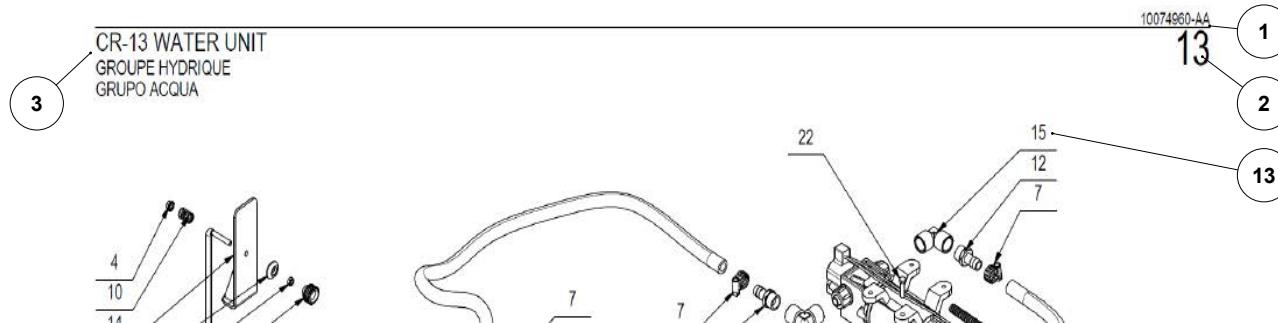

ATENCIÓN: está absolutamente prohibido quitar o manipular la placa de matrícula.

CÓMO LEER LAS LÁMINAS DE LOS REPUESTOS

Este documento contiene las láminas de los repuestos.

Para consultarlas correctamente, lea la leyenda que figura a continuación:

1. NÚMERO DE DOCUMENTO - VERSIÓN: identifica el número de documento y la versión de la lámina de repuestos representada.
2. LÁMINA: identifica el número de representación de los grupos principales en los que se ha subdividido la máquina.
3. DENOMINACIÓN: es el nombre con el que se identifica el grupo representado en la lámina de repuestos.

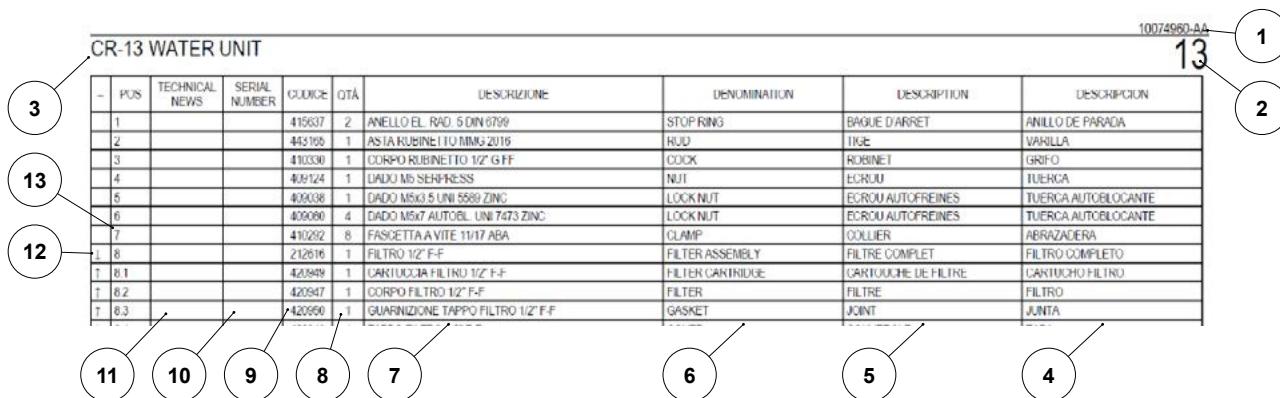

4. DESCRIPCIÓN: identifica la descripción en ESPAÑOL de la pieza de repuesto asociada.
5. DESCRIPTION: identifica la descripción en FRANCÉS de la pieza de repuesto asociada.
6. DENOMINATION: identifica la descripción en INGLÉS de la pieza de repuesto asociada.
7. DESCRIZIONE: identifica una descripción más detallada en ITALIANO de la pieza de repuesto asociada.
8. CANTIDAD: identifica el número de piezas de repuesto utilizadas para el grupo ilustrado.

9. CÓDIGO: identifica el número de referencia con el que se identifica la pieza de repuesto asociada.
10. SERIAL NUMBER: indica el número de serie de la primera máquina fabricada con la modificación técnica notificada en la "technical news" correspondiente.
11. TECHNICAL NEWS: indica el número de documento de una "technical news" donde se describe una modificación técnica asociada a la pieza.
12. _: lleva el símbolo gráfico que permite identificar si la pieza asociada es un conjunto formado por varios elementos o si se trata de un solo elemento.

↓	indica que la pieza a la que está asociada es un conjunto formado por varios elementos.
↑	indica que la pieza asociada forma parte de un conjunto.
→	indica que la pieza asociada es válida a partir del número de serie indicado.
←	indica que la pieza asociada es válida hasta el número de serie indicado.

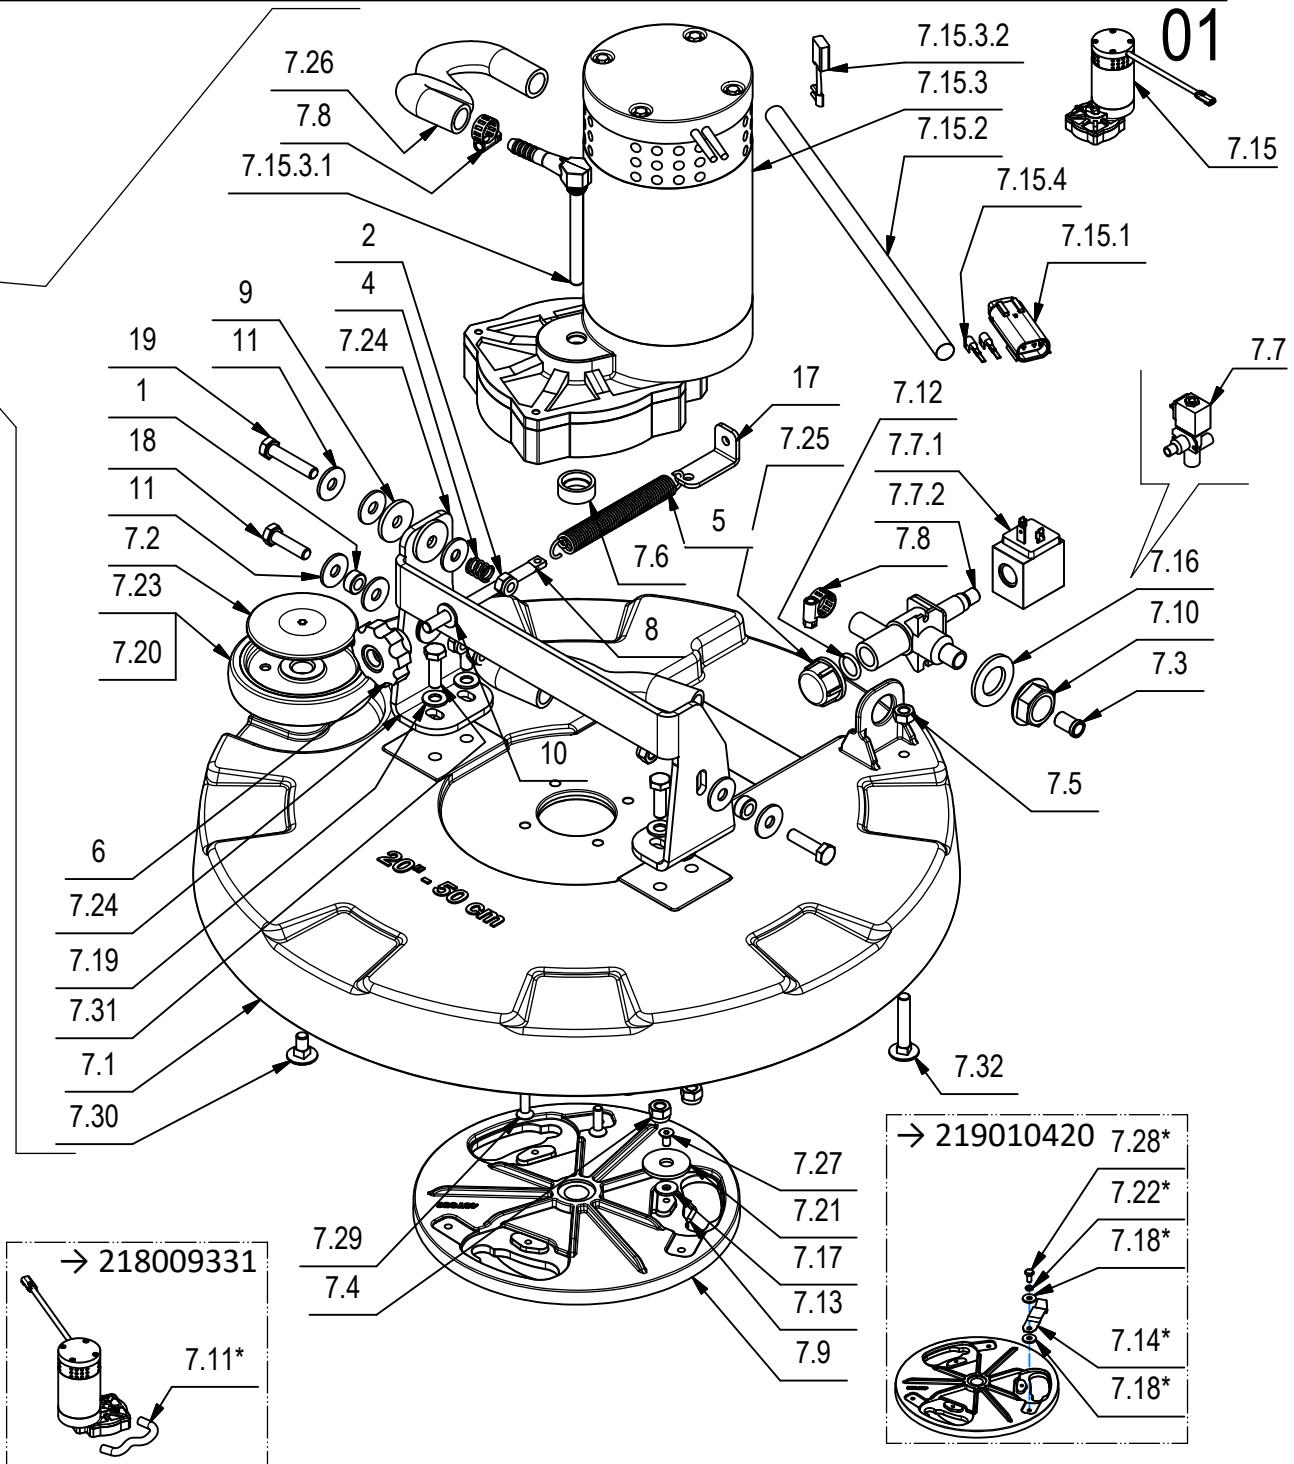

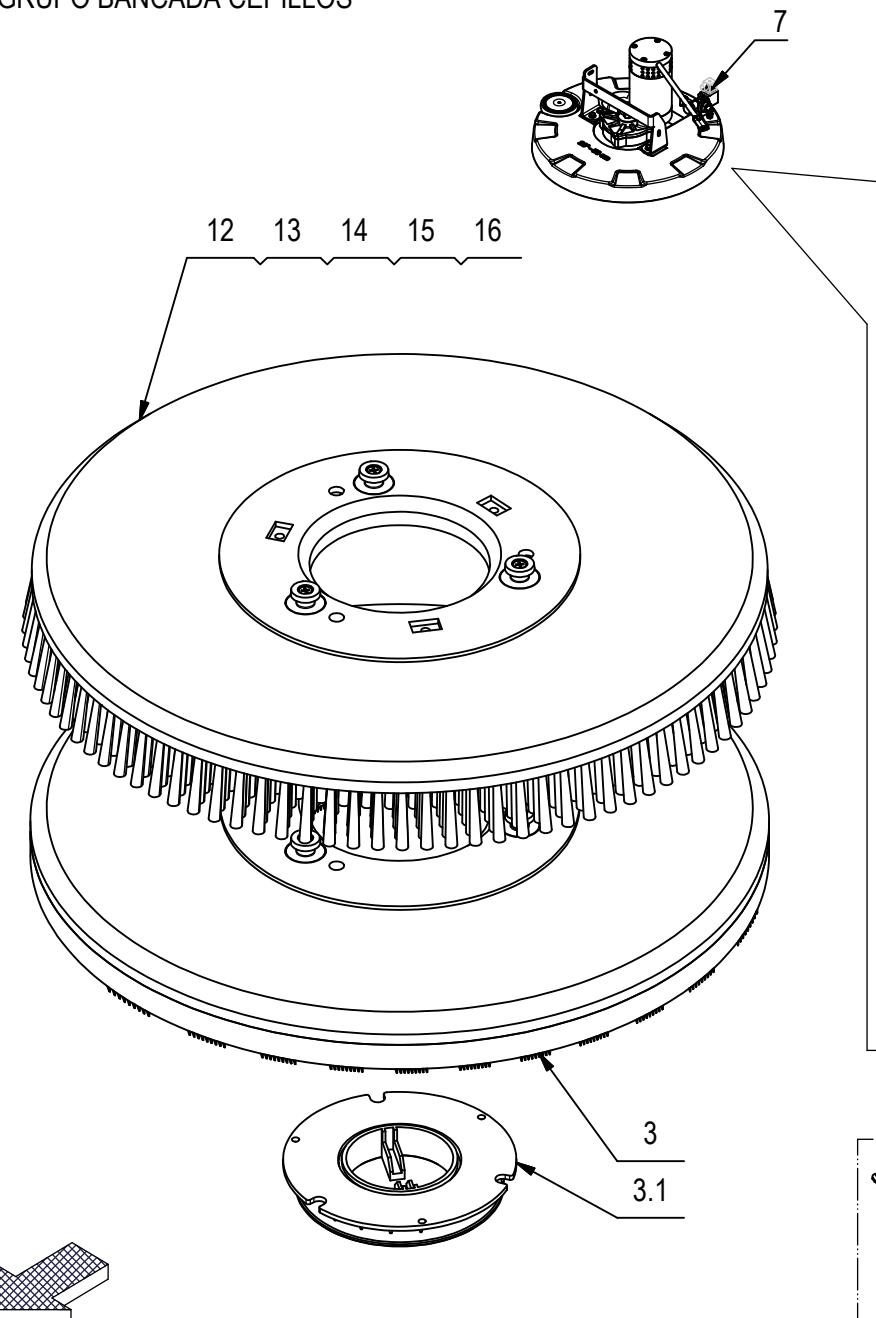

13. POS: indica el número de posición que identifica la pieza en la ilustración. Si el número de identificación contiene el símbolo ".", significa que representa una pieza que compone un conjunto.
