

Fig. 1. Distribution of BrdU-labeled cells in a colonic crypt. The crypt is shown in cross-section. The stem of the crypt is the upper portion, and the base is the lower portion. The BrdU-labeled cells are shown in the stem and base of the crypt. The BrdU-labeled cells in the base of the crypt are more numerous than those in the stem.

crypts were labeled with BrdU. The BrdU-labeled cells were counted in the stem and base of the crypts.

The BrdU-labeled cells in the stem and base of the crypts were counted in the stem and base of the crypts.
