

## THE BATTERY

1. The battery is the power source for the system.

2. It provides the energy to start the engine.

3. It provides the energy to run the electrical system.

4. It provides the energy to run the engine.

5. It provides the energy to run the alternator.

6. It provides the energy to run the lights.

7. It provides the energy to run the horn.

8. It provides the energy to run the wipers.

9. It provides the energy to run the power windows.

10. It provides the energy to run the power locks.

11. It provides the energy to run the power mirrors.

12. It provides the energy to run the power seats.

13. It provides the energy to run the power windows.

14. It provides the energy to run the power locks.

15. It provides the energy to run the power mirrors.

16. It provides the energy to run the power seats.

17. It provides the energy to run the power windows.

18. It provides the energy to run the power locks.

19. It provides the energy to run the power mirrors.

20. It provides the energy to run the power seats.

21. It provides the energy to run the power windows.

22. It provides the energy to run the power locks.

23. It provides the energy to run the power mirrors.

24. It provides the energy to run the power seats.

25. It provides the energy to run the power windows.

26. It provides the energy to run the power locks.

27. It provides the energy to run the power mirrors.

28. It provides the energy to run the power seats.

29. It provides the energy to run the power windows.

30. It provides the energy to run the power locks.

31. It provides the energy to run the power mirrors.

32. It provides the energy to run the power seats.

## DISASSEMBLY

1. The terminal cap is used to protect the terminal post from corrosion and damage.

2. It is made of a material that is resistant to corrosion.

3. It is designed to fit snugly over the terminal post.

4. It is used to secure the terminal post to the battery.

5. It is used to prevent the terminal post from becoming loose.

6. It is used to prevent the terminal post from becoming damaged.

7. It is used to prevent the terminal post from becoming corroded.
