

ROCKERBALL™ CUSHION HITCH GOOSENECK BALL

The RockerBall™ cushion hitch gooseneck ball features a cutting-edge structure combined with unique ShockDrop™ technology to provide a smoother, more comfortable towing experience without having to purchase or replace the entire hitch.

ROCKERBALL™ CUSHION HITCH GOOSENECK BALL

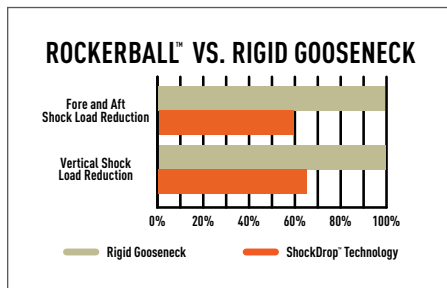

CHANGE THE WAY YOU TOW

ShockDrop™ technology

RockerBall's integrated ShockDrop technology reduces jerking and jarring and promotes truck longevity by minimizing strain and saving on the vehicle's wear and tear

Advanced engineering

Cushioned isolator reduces rattling and vibration while the offset pin dampens vertical chucking and fore-to-aft motion during starts and stops, ultimately improving ride comfort and quality

Simple installation

This ball has a simple drop-in installation and is compatible with CURT Double Lock EZr™, Double Lock Original and B&W Turnoverball® gooseneck hitches with round or square holes

Durable construction

RockerBall is built with forged steel for dependable towing strength. Its base is covered in a durable black powder coat finish, and the ball itself has a chrome plating for long-lasting weather resistance

Additional Features

- Cushioned isolator improves ride comfort for animals and passengers
- Offset pin dampens vertical chucking and fore-aft motion during starts and stops
- Virtually maintenance-free with no airbag or bearings to service
- Tested for safety to meet SAE J2638 specifications
- Gooseneck hitch center section sold separately
- Patent pending
