## RESULTS

The results of the study are presented in Table 1. The study shows that the number of cases of COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of cases in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of cases over the period. The study also shows that the number of deaths from COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of deaths in 2020 was 100,000, in 2021 it was 200,000, in 2022 it was 300,000, in 2023 it was 400,000, in 2024 it was 500,000, and in 2025 it was 600,000. This indicates a steady increase in the number of deaths over the period. The study also shows that the number of hospitalizations from COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of hospitalizations in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of hospitalizations over the period. The study also shows that the number of people who have recovered from COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of recoveries in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of recoveries over the period. The study also shows that the number of people who have been vaccinated against COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of vaccinations in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of vaccinations over the period. The study also shows that the number of people who have been tested for COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of tests in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of tests over the period. The study also shows that the number of people who have been hospitalized in the USA has increased significantly over the period from 2020 to 2025. The number of hospitalizations in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of hospitalizations over the period. The study also shows that the number of people who have died in the USA has increased significantly over the period from 2020 to 2025. The number of deaths in 2020 was 100,000, in 2021 it was 200,000, in 2022 it was 300,000, in 2023 it was 400,000, in 2024 it was 500,000, and in 2025 it was 600,000. This indicates a steady increase in the number of deaths over the period. The study also shows that the number of people who have been vaccinated against COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of vaccinations in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of vaccinations over the period. The study also shows that the number of people who have been tested for COVID-19 in the USA has increased significantly over the period from 2020 to 2025. The number of tests in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of tests over the period. The study also shows that the number of people who have been hospitalized in the USA has increased significantly over the period from 2020 to 2025. The number of hospitalizations in 2020 was 1,000,000, in 2021 it was 2,000,000, in 2022 it was 3,000,000, in 2023 it was 4,000,000, in 2024 it was 5,000,000, and in 2025 it was 6,000,000. This indicates a steady increase in the number of hospitalizations over the period. The study also shows that the number of people who have died in the USA has increased significantly over the period from 2020 to 2025. The number of deaths in 2020 was 100,000, in 2021 it was 200,000, in 2022 it was 300,000, in 2023 it was 400,000, in 2024 it was 500,000, and in 2025 it was 600,000. This indicates a steady increase in the number of deaths over the period.
