Thermoformed-twin-sheet-technology built pop-up roof for Fiat Ducato H2 with 200 x 130 cm double bed and hot and cold air system

Product shape repeatability:

Utilizes thermoformed, twin-sheet technology instead of fiberglass, making it easier to produce and saving on the total product weight.

Air conditioning and heating arrangements:

The patented design provides a layer of versatility for multiple uses and arrangements.

Weight optimization:

This product was intelligently engineered using materials that help to reduce weight.

- **Color:** GLOSSED GREY RAL7040 (reflectance higher than 55%/absorbance lower than 0,2%)
- **Bed frame with slats:** Large aluminum bed frame with wooden slats
- **Lateral bed lights:** Two LED light with a USB port integrated
- **Switch:** Main switch to control the roof light with 2 USB port integrated
- **Roof lights:** Two LED strips fully integrated into the roof countertop
- **Wiring:** All the electric cable needed to manage the roof light and solar panel
- **Ladder:** A folding ladder strong and cool to climb on the roof
- **Glue:** A specific glue tested to have the best installation performance

SMARTROOM®

Slide-out

Lippert leads the industry in innovative slide-out technology for leisure vehicles, building more than 600,000 slide-out systems for the world market every year. We have more than 80 slide-out-related patents and offer a complete line of slide-out solutions to maximize space and enhance the camping experience.

The award-winning SmartRoom slide-out increases the living space within your caravan or motorcaravan.

More space. Less weight.

The space created by the SmartRoom weighs less than the space of the rest of the vehicle because it does not require additional frame and chassis components. With its innovative design, the vehicle maintains its overall length, weighs less and features more living space.

Example specifications

- Shortens caravan length by 813 mm
- Reduces weight by 106 kg
- Increases space by 0,60 square meters

This example layout not only increases living space while decreasing unit weight; it also makes the unit easier to walk through.

SmartRoom version

Standard version

Figure	 Weight	 Length	 Area	 Transportation Width
SmartRoom	1.868 kg	6.651 mm	17,60 sqm	2.286 mm
Standard	1.974 kg	7.464 mm	17,00 sqm	2.286 mm

SMARTROOM KITS

The SmartRoom kit extends your vehicle's wall to allow you to increase space and decrease the overall weight of your vehicle, giving you the same comfort of a motorhome. The system is also equipped with an 'open SmartRoom' sensor that helps prevent the vehicle from driving away while in the open position.

The four-motor system is versatile, flexible and easy to install. It features a motor at each corner of the room and transfers the movement through a rack and pinion system.

Kits include

- Four corners with pre-assembled motor
- All necessary wiring
- Remote panel
- Control unit and relay kit
- SmartRoom drive key
- Installation manuals of the room and configuration of the control unit

Part #	↕ Max Stroke	↗ Max Dimensions		Absorption	
				Medium	Peak
2021012411	700 mm	3.500 mm x 2.000 mm	40 kg	10 amps	40 amps
2021092788	1.000 mm	3.500 mm x 2.000 mm	40 kg	10 amps	40 amps

SMARTROOM FRAME KITS

Kits include

- Frame
- Frame brackets
- Seal
- Screws
- Roller supports

The seal is a single piece of rubber designed with a specific V-shape. Working with the wide radius of the angle pieces and flat surfaces of the side walls, this seal provides superior adherence to avoid water leaks and dirt accumulation.

Four motor

The four-motor system is versatile, flexible and easy to install. It features a motor at each corner of the room and transfers the movement through a rack and pinion system.

Part #	↕ Width	↕ Height	Color	📦
2021103466	1.600 mm	1.500 mm	White	Aluminum
2021103455	2.500 mm	2.000 mm	White	Aluminum
2021103464	3.500 mm	2.000 mm	White	Aluminum

BIKE CARRIERS

Let your customers bring their bikes along for the adventure with Lippert bike carriers. We offer several different styles to integrate with the layout of the campervan. Our quality designs provide your customers with a reliable solution to confidently transport their bikes.

**Whenever, wherever, we
make your experience better.**

R-BIKE VAN

Bike carriers

This multi-purpose bike carrier can be installed on the back, right-side door of the van and allows the door to be opened when bikes are loaded. The R-Bike Van allows you to mount the tray-style rail in three different height positions (standard, intermediate and lowered) to allow for easy loading and unloading of the bikes.

- Available in two finishes:
 - Standard version in anodized aluminum
 - Corrosion-resistant automotive finish in all black
- Designed for conversion vans
- Accepts two E-bikes (Can extend to fit three standard bikes with R-Bike 3Rail accessory, sold separately)
- Customizable design for easy installation and mounting
- Robust and secure construction protects valuable bikes
- Built-in anti-vibration device deters unwanted noise
- Designed for serviceability and compatible with multiple accessories

2021103607	Holdy Hang	4

WINDOWS & ROOF VENTS

Polyplastic caravan and campervan windows provide a clear view of the adventure, featuring high-quality construction and intuitive functionality coupled with seamless integrated designs.

Whenever, wherever, we make your experience better.

Polyplastic window features

- Made from cast acrylic PMMA (Roxite®)
- Shatterproof sheet material with 3 mm nominal thickness
- Exceptional optical and thermal properties
- High transparency and higher light transmission compared to other solutions
- Lighter and 11 times stronger on impact than glass solutions
- Special UV protection against fading and yellowing
- Various decorative screen print options
- Standard 2-year warranty
- E1 approved

See the following pages for our window offering.

PRIMO

Hinged window system

- Entry-level top-hung hinged window system
- Designed for side and rear RV windows, custom available for RV front windows
- Modular system with options and a choice of parts and accessories
- Bulged, robust design with solid edges
- Double pane, cast acrylic window with a flat unformed inner sheet and thermoformed outer sheet
- Window system comes standard with integrated Polyfix catches for quick and easy installation (no screws needed)
- System options available for acrylic, screen and hinge bar colors, parts and accessories
- Screw connected aluminum top hinge bar
- Tubular or automatic stays allow for opening in every position
- Optional integrated lock button in the catches

ADDITIONAL PARTS & ACCESSORIES

Applicable to Polyvision Slide, Eco, Aero and Curved

1. Parts for Assembly

Installation hardware is not included in the window system. Must be ordered separately.

Mounting clamps

- Wall thickness 24 - 33 mm
- Wall thickness 33 - 36 mm
- Wall thickness 38 - 45 mm

Screws

- One size (material dependent)

2. Possible Accessories

Interior finish rubber cover

Used as interior finish to cover gaps and hide the misalignment of the window inside of the RV

- White: small wall thickness (24 - 37 mm)
- Black: large wall thickness (38 - 44 mm)

Interior blind and flyscreen

Depending on the choice of blind, an additional rubber cover may be needed to cover gaps and hide the misalignment of the blind

POLYLUX

Aluminum framed window system

- Electrically operated, sliding roof window (12V, 20A, 240W)
- Designed for the rooftop of an RV
- Special aerodynamic design ideal for flat roofs
- Double pane, cast acrylic window with a thermoformed or unformed inner sheet and thermoformed outer sheet
- Strong and lightweight powder-coated aluminum frame
- Easy-to-use electrical operation with the touch of a button
- Low noise level while driving with an open window
- Operation temperature of -20 to +50 degrees Celsius
- Integrated blind system with blind and flyscreen
- Easy to mount for quick installation

STEPS

Our broad range of caravan and motorcaravan steps are available in steel, aluminum and hi-tech polymer with manual and power configuration options to suit every need. We offer single, double and triple entry steps for caravans and motorcaravans.

**Whenever, wherever, we
make your experience better.**

ALANERA

Electric slide-out step

The Alanera slide-out step is designed to meet the style of the modern motorcaravan with its sleek profile and high-quality finish, combined with improvements in both weight savings and ease of use.

- High-power 12-volt motor fully extends step in 2,5 seconds
- Automatic slide-out motion for a safe, comfortable, unobtrusive step
- High-tech injection-molded polymer for a durable yet lightweight construction
- Anti-slip finish for safe entry and exit
- Side wings help integrate the step with the vehicle and can support a person's weight
- Automotive-quality finish for lasting resilience to the elements
- Easy to clean – simply spray off with a hose
- Combined absorption limit with Elektra.PLUS control unit (#2021015901): 6,8-amps
- Installation wiring cables included with electric models
- Installation kits available for:
Fiat Ducato / Citroen Jumper / Peugeot Boxer
Ford Transit and Mercedes-Benz Sprinter

Sleek, modern design to complement modern caravans and motorcaravans

Unique drain channels and anti-slip finish help keep the tread clean in any weather

INNOLIGHT

Electric and manual slide-out steps

- High-power 12-volt motor fully extends step in 2,5 seconds (electric version only)
- Patented guides and ball bearings ensure frictionless slide for smooth operation
- 80% plastic and 20% steel / aluminum construction to be lightweight and durable
- Sturdy, anodized aluminum footboard for lasting corrosion resistance
- Integrated motor sensor for 'open step' warning
- Weatherproof, tested for outdoors
- Integrated thermal breaker in case of excessive strain
- Includes patented, manual, quick-release emergency system
- Combined absorption limit with Elektra.PLUS control unit (#2021015901): 6,8-amps
- M-HANDLE (#2020343215) for manual step extension and retraction
- Installation wiring cables included with electric models
- Installation kits available for Fiat Ducato, Citroen Jumper, Peugeot Boxer, Ford Transit, Mercedes-Benz Sprinter and Volkswagen Crafter
- Front covers available to integrate the step with the vehicle

R-SERIES

Electric and manual fold-out steps

- Designed for RV application with standard chassis height
- High-power motor for fold-out movement in 1,5 seconds (electric version only)
- Ball bearings and brass bushings promote smooth, quiet operation
- Steel frame with lightweight aluminum board for stability in all conditions
- Galvanized and epoxy finishes for strong corrosion protection
- Anti-shock clutch protects motor and gearbox while step is in motion
- Sensor integrated in the motor cover for 'open step' warning
- Integrated thermal breaker in case of excessive strain
- Includes patented, manual, quick-release emergency system
- Installation wiring cables included with electric models

Tested for outdoor in extreme climate conditions

STEP ACCESSORIES

2020335144

LIGHTING STEP

- Compatible with steps with aluminum footboard
- Includes blue LED strip, anti-slip see-through rubber strip and timer
- Note: This is optional for steps manufactured from February 2010 to present. For all steps manufactured before this term, it is necessary to replace the entire footboard

2020331017

E-KIT

- Simplifies installation with plug-and-play system
- Intended for connecting existing wiring to the electronic control box
- Includes: 3 m or 6 m long cable, start switch, LED warning light, 15-amp fuse holder and connection scheme
- Compatible with all Lippert electric steps

2020330854

CLOSY

- Enables automatic storing for electric steps when starting vehicle's engine
- Prevents steps from opening while driving
- Compatible with all Lippert electric steps

2021013392

2021013392

ELEKTRA.PLUS control units

- Makes system completely automatic with opening or closing of the door
- Reduced size and integrated light timer
- See table for step compatibility

2020331019

2020339978

SWITCH and SWITCH COVER

- Rocker switch to open or close electric fold-out steps
- Compatible with all Lippert electric steps
- Cover provides a clean finished look on the #2021104055 switch (cover sold separately)

2020330880

2020330877

BLINDS & FLYSCREENS

Shut out the harsh sunlight and create a cool, peaceful ambiance inside with Lippert window blinds. We offer a complete selection of various sizes, styles and functional designs. Also check out our Vanscreen door screen for a bug-free interior.

Whenever, wherever, we make your experience better.

SKIA

Windshield and side window blinds

- Retractable, pleated blind to keep vehicle interior blacked-out while parked
- Provides interior privacy as needed
- PVC and aluminum handle for manual horizontal sliding operation
- Windscreen blind available in three versions: with sensor box, rearview mirror or standard
- Side window blinds available in two versions: one (left / right) specific for Ducato V7 and one (left / right) specific for Ducato V8

Retractable, pleated blind to keep vehicle interior blacked-out while parked

Part #	Description	Fits
2021103816	SKIA FRONT - Front cabin blind standard version	For Fiat DUCATO X250, X290 and V8
2021103803	SKIA FRONT - Front cabin blind with mirror compartment	For DUCATO X290 / X250 and V8
2021103806	SKIA FRONT - Front cab blind with mirror compartment and sensor	For DUCATO X290 / X250
2021103733	SKIA FRONT - Front cab blind with specch and sensors	For Fiat DUCATO V8
2021103723	SKIA SIDE - Side cabin blind (right and left)	For Fiat DUCATO Van X290 / X250 (V7)
2021103745	SKIA SIDE - Side cabin lateral (right and left)	For Fiat DUCATO Van V8

VANSCREEN

Flyscreen for van doors

- Aluminum sliding flyscreen with low, walkable, L-shaped guide
- Keeps out insects and debris while allowing fresh airflow
- Clutched sliding system allows the screen to be opened to any position
- Vanscreen should be left open while van door is closed to avoid obstruction
- Works independently of sliding door

Keeps out insects and debris while allowing fresh airflow

Clutched sliding system allows the screen to be opened to any position

Part #	Fits Vans With Lateral Sliding Door	↕ H	↕ W
2021103812	Ducato van X290 Ducato van X250 Ducato van V8	1.295 mm	1.708 mm

DOORSCREEN

Flyscreen for motorcaravan doors

- PVC and aluminum sliding flyscreen with walkable, U-shaped guide
- Keeps out insects and debris while allowing fresh airflow
- Clutched sliding system allows the screen to be opened to any position

SIRIO ALU

Curved blind and flyscreen

- Retractable blind to help regulate light filtration and protect privacy
- Manual sliding system with spring-assist for easier operation
- Clutched sliding mechanism allows opening to any position
- Mesh screen keeps out insects and debris while allowing fresh airflow
- Aluminum frame construction and polyester fabric blinds
- Integrated aluminum handle for easy operation
- Tough ABS locking clip for improved security
- Compatible with curved-wall vans in 4991 radius

SIRIO 2.0

Blind and flyscreen

- Retractable blind to help regulate light filtration and protect privacy
- Manual sliding system with spring-assist for easier operation
- Clutched sliding mechanism allows opening to any position
- Mesh screen keeps out insects and debris while allowing fresh airflow
- Constructed with durable PVC frame and polyester fabric blinds
- Integrated aluminum handle for easy operation
- Compatible with all vehicles with flat walls

DOUBLE HANDLE

Windshield blind

- Retractable, honeycomb blind to keep vehicle interior blacked-out while parked
- Manual sliding system with spring-assist for easier operation
- Clutched sliding mechanism allows opening to any position
- Locking clip fixes the fabric in the final position
- Integrated aluminum and plastic handle for easy operation
- Strong, lightweight aluminum frame construction
- White outer fabric with cream-colored inner side
- Also protects interior privacy as needed

2021103810

BANDY-VAN

Skylight blind

- Retractable, pleated blind to help regulate light infiltration and protect privacy
- Manual sliding system with spring-assist for easier operation
- Clutched sliding mechanism allows opening to any position
- Mesh screen keeps out insects and debris while allowing fresh airflow
- Integrated aluminum handle for easy operation
- Strong, lightweight aluminum frame construction
- White outer fabric with silver-colored inner side

2021103804

BANDY CURVE

Flyscreen blind

- Retractable, pleated blind to regulate light infiltration and protect privacy
- Manual sliding system with spring-assist for easier operation
- Clutched sliding mechanism allows opening to any position
- Mesh screen keeps out insects and debris while allowing fresh airflow
- Integrated aluminum handle for easy operation
- Strong, lightweight aluminum frame construction
- White outer fabric with silver-colored inner side

2021103781

BANDY FLAT

Flyscreen blind

- Retractable, pleated blind to keep vehicle interior blacked-out while parked
- Manual sliding system with spring-assist for easier operation
- Clutched sliding mechanism allows opening to any position
- Integrated aluminum handle for easy operation
- Strong, lightweight aluminum frame construction
- White outer fabric with silver-colored inner side
- Also protects interior privacy as needed

2021103802

BEDS, ACCESSORIES & LADDERS

Lippert bed frames and lifts are engineered for comfort and adaptability, ensuring that your vehicle is truly a home away from home. We offer tilt and lift options, electric, convertible, extendable, foldable and much more. Browse our ladders and other accessories to maximize bed functionality.

**Whenever, wherever, we
make your experience better.**

SMART TILT TOP & TOP DINETTE

Electric bed lifting system

- Engineered to lift and / or lower in the rear garage, above the dinette or driver's seat
- Operated by a central unit with up to five programming levels (ProBed and TopLine) or by an electro-mechanical controller (E-Line)
- High-performing gear motor with optional integrated encoder
- Belts fasten on specific wall-mounted supports
- Device fits completely under the bed frame and offers maximum fitting flexibility
- Manual driving gear in case of emergency
- Delivered complete with mounting cables
- 60 kg maximum weight lifted capacity
- 400 kg maximum loading capacity (static)
- Electrical input: 9- to 19-amps
- Motion speed: approximately 60 mm / sec
- Weight approximately 8,6 kg (varies based on the requested configuration)
- The technical specifications may change depending on the configuration of the bed
- Unlimited stroke

Smart tilt top (A class)

Bed Frame Details
(see page 82)

A, C

Top dinette (low profile)

EVO

Bed lifting system

- Allows lifting and lowering of the bed to fully optimize Interior space
- Available with electric motor or manual crank option
- Remains stable at any height with no need for additional locking
- Belts fasten on specific wall-mounted supports
- Steel and aluminum construction to be strong and lightweight
- Includes mounting brackets and lifting mechanism (slats and bed frame sold separately)

Allows lifting and lowering of the bed to fully optimize Interior space

Operation	↕ Stroke	📦 Lift Capacity	📦 Static Load Capacity	📦 Product*
Manual	400 mm	100 kg	400 kg	13 kg
Electric	400 mm	100 kg	400 kg	13 kg

* Variable according to the requested configuration

SMART-SLIM BED

Low-profile bed lifting system

- Allows lifting and lowering of the bed to fully optimize Interior space
- Low-profile bed frame to maximize internal height and reduce weight
- Belts fasten on specific wall-mounted supports
- Aluminum frame with wood slats
- Includes bed frame and lifting system

Stroke	 Lift Capacity	 Static Load Capacity	 Product
900 mm	60 kg	350 kg	27 kg

TOSCANA

Bed lifting system

Bed Frame Details
(see pages 82-83)

D, E, F

- Allows lifting and lowering of the bed to fully optimize Interior space
- Motor is mounted under the frame to remain hidden and unobtrusive
- Anodized aluminum frame with wood slats to be strong and lightweight
- Can be installed in rear garage, over dinette or over driver's seat
- Unlimited stroke to better conform to the vehicle interior
- Available with two electronic control options:
two-position stop or variable-position
- Belts fasten on specific wall-mounted supports
- Available with electric motor or manual crank option
- Customizable bed shape to suit each unique vehicle
- Manual driving gear in case of emergency
- Electrical input: 8 to 12-amps
- 12-volt DC
- Includes bed frame and lifting system

 Static Load Capacity	 Product
350 kg	24 kg

NAIROBI

Bed lifting system

- Allows lifting and lowering of the bed to fully optimize Interior space
- Available with electric motor or manual crank option
- Variable-position backrest with safety lock
- Maximum tilt in backward position approximately 114°
- Book-like opening for easy access to the storage space below
- Device delivered mounted and preinstalled
- Constructed with an aluminum frame and guides, steel legs and wood slats
- Includes bed frame, handling kit, legs and guides

Electric version only

- Total absorption of the device: 9-amps
- Operating speed: 15mm / sec
- 12-volt DC
- Manual emergency system

Manual version only

- Three-position Project Easy Lift System for easy movement and positioning

Book-like opening for easy access to the storage space below

Variable-position backrest with safety lock

 Lift Capacity	 Static Load Capacity
80 kg	300 kg

B

BERLINO

Bed lifting system

- Provides up and down lift for the two bunk beds with application in rear garage
- Unlimited stroke to better conform to the vehicle interior
- Powered by durable and sophisticated gear motor with integrated encoder
- Belts fastens on specific wall-mounted supports
- Single motor is mounted under lower frame to remain hidden and unobtrusive
- Manual driving gear with included hand crank in case of emergency
- The technical specifications may change depending on the configuration of the bed
- Constructed with an aluminum frame and guides, steel legs and wood slats
- Includes two bed frames, motorized kit, controller, harnesses and guides
- Operating speed: approximately 60 mm / sec
- Electrical input: 19-amps

Bed Frame Details
(see page 82)

 Lift Capacity	 Static Load Capacity
60 kg	400 kg

DENVER

Bed lifting system with extending frame

- Allows lifting and lowering of the bed to fully optimize Interior space
- Extendable frame accommodates a larger mattress while ensuring compact storage (extended section must be supported)
- Locks horizontally or in slant position under the ceiling for convenient storage
- Electrically operated by E-Line for a lightweight, quiet system
- Extends up to 80% of the width of the fixed frame
- Constructed with an aluminum frame and guides, steel legs and wood slats
- Includes bed frame and mounting brackets
- Includes manual emergency system
- Operating speed: approximately 100 mm / sec
- Absorption: 16 amps
- 12-volt DC

Bed Frame Details
(see page 82)

A

 Lift Capacity	 Static Load Capacity
60 kg	300 kg

RIO

Bed lifting system with extending frame

- Automatic slat extension as the bed lowers and retraction as it raise
- Allows lifting and lowering of the bed to fully optimize Interior space
- Extendable frame accommodates a larger mattress while ensuring compact storage
- Ability to program different bed frame extensions for various positions
- Electric motor with Top-Line handling for a quiet, lightweight system
- Constructed with an aluminum frame and guides, steel legs and wood slats
- Includes two bed frames, motorized kit, controller, harnesses and guides
- Includes manual emergency system
- Operating speed: approximately 100 mm / sec
- Absorption: 19 amps
- 12-volt DC

Bed Frame Details

SEVILLA

Bed lifting system with folding frame

- Allows lifting and lowering of the bed to fully optimize Interior space
- Possibility to have a powered knee mechanism
- Knee-like bend allows frame to adapt to vehicle ceiling for unobtrusive storage
- Electrically operated by E-Line for a quiet, lightweight system
- Adjustable movement for a fully customizable layout
- Equipped with stabilizers on extended sides for enhanced strength
- Constructed with an aluminum frame and guides, steel legs and wood slats
- Includes bed frames, slats and mounting brackets
- Includes manual emergency system
- Operating speed: approximately 100 mm / sec
- Absorption: 9 to 20 amps
- 12-volt DC

Bed Frame Details
(see page 82)

2020334767	STANDARD GUIDE - 990 mm
2020341978	C-SHAPE GUIDE - 1.600 mm

BACKREST

- Available in manual or electrical
- Completely autonomous and integrable with the bed frame

LIFTY HANDLE

- Allows manual movement of the bed

CABLE TRACK

- Comes in two lengths
- Available in black or beige

STANDARD GUIDE

- Standard guide for lifting beds

BELTS

- Help make lifting beds easier
- Available in black, grey and white cream

SAFETY STRAP

- Promotes safety while bed is lifted
- Fits all lifting beds

LIFTING CAPACITY

- Belt roller system to help belts move easier when raising or lowering the bed
- Without belt-return system 60 kg
- Option to add the return-belt system to lift up to 120 kg

C-SHAPE GUIDE

- Helps overcome furniture obstacles without modifying vehicle layout
- C-shape guides are the most adaptable guides
- Work in compression and decompression

WATER TANK ACCESSORIES

Male Plug

- Fits all Lippert water tanks
- Made of durable nylon

2021103639

Gasket

- Fits Lippert male (#2021103639) and female (#2021107147) plugs
- Made of neoprene

2021107082

Female Plug

- Fits all Lippert water tanks
- Made of durable nylon

2021107147

Expansion Plug

- Hinging lever expands rubber to plug tank

2021103689

Part #	Description	↕
2021103639	Male plug	125 mm
2021107147	Female plug	140 mm
2021107082	Gasket for #2021107147 / #2021103639	125 mm
2021103689	Expansion plug	22 mm

POWER ON BOARD

A steady, on-board power supply is an essential part of mobile travel. Charging systems from Schaudt by Lippert enable batteries to be perfectly charged and on-board electrical devices to be supplied with power in all situations.

**Whenever, wherever, we
make your experience better.**

- Customized solutions for series production of RV's, vans and (autarkic) caravans
- Panels can be customized by printing also for smaller series (> 100 EAQ)
- Solutions for your electric and electronic necessities
- Power supply systems (EBL with chargers, LED, LCD and touch panels and tank and battery sensors)
- Connected by bus or conventional
- Connecting our conventional and bus-systems to external devices via bus

Charging devices to complete the system:

- Boosters for optimal charge on the road
- External chargers for higher charge-current by 230V
- Solar-regulators for optimized charging by solar-panels

Light systems

- Controlled analogue or by bus
- Various light-systems from one circuit up to 10 circuits with memories and presets

On the next pages you'll find examples of our product-portfolio.

MOTORCARAVAN & CARAVAN BOOSTERS

Motorcaravan (WA 121545)

- Charges 12-volt lead-acid, lead-gel, AGM and lithium batteries while driving, regardless of alternator voltage
- A voltage sensor is required for optimal charging of the living area and starter batteries
- When using an energy-saving charging alternator (Euro 6), using a booster is required because the charging voltage fluctuates very strongly (12,6 to 15 volts)
- When using a conventional alternator, the living-area battery charge can be improved by using a booster
- For AGM batteries that require a charging voltage of 14,7 volts, using a booster is required
- Charging characteristic curve: IUoU (current-dependent switchover to trickle charge)
- Temperature compensation when a sensor is connected
- Maximum charging current is adjustable in four increments (optional): 45-, 55-, 63- and 70-amp

Motorcaravan (WA 121525)

- Charges 12-volt lead-acid, lead-gel, AGM and lithium batteries while driving, regardless of alternator voltage
- When using an energy-saving charging alternator (Euro 6), using a booster is required because the charging voltage fluctuates very strongly (12,6 to 15 volts)
- When using a conventional alternator, the living-area battery charge can be improved by using a booster
- For AGM batteries that require a charging voltage of 14,7 volts, using a booster is required
- Charging characteristic curve: IUoU (current-dependent switchover to trickle charge)
- End-of-charge voltage 14,4 to 14,7 depending on battery type (at a battery temperature of 25°C)
- Temperature compensation when a sensor is connected (optional)

Caravan (WA 1208)

- Increases the charging voltage in the caravan so that the caravan battery can be charged when driving
- Cut-off from towing vehicle when ignition is switched off
- Voltage compensation of fluctuating alternator voltage
- Status info via LED
- For the use in caravans (not suitable for motorcaravans)

Model	Output Current	Max Input Current	Input Voltage	Output Voltage	Reverse Current Caravan Battery		 Height	 Width	 Depth
Motorcaravan booster (WA 121545)	Up to 70 amps	65 amps	12 to 15 volts	14,7 volts**	<0,2mA*	1150 gr	73 mm	170 mm	193 mm
Motorcaravan booster (WA 121525)	25 to 30 amps	28 amps	12 to 15 volts	14,7 volts**	<0,2mA*	400 gr	59 mm	148 mm	95 mm
Caravan booster (WA 1208)	8 amps	11 amps	9 to 14,5 volts DC	14,4 volts	<0,5mA*	270 gr	55 mm	148 mm	95 mm

* With ignition off or engine off

** Up to 15,1 volts depending on battery temperature and selected battery type

SOLAR REGULATORS (12-VOLT DC)

Solar regulator (LRM 1218)

This clocked regulator that ensures the connected solar modules are always properly functioning while the battery is in the mains charging phase regardless of solar radiation, battery voltage and module temperature.

- Charging voltages can be adapted to the living area battery through the optional temperature sensor and the setting options
- Charging current to the living area battery max 20-amp (starter battery 2,5-amp)
- Suitable for six-cell 12-volt lead-acid, AGM or lead-gel batteries
- Characteristic curve: IUoU, control principle: MPP
- Charging voltage range 13,2 to 14,9 volts (temperature controlled)
- SDTBUS capable

Solar regulator (LR 1218)

This regulator limits and regulates the charging voltage from the solar modules. It ensures up to two batteries are partially charged.

- Built-in isolation diode prevents discharge if the charging voltage is insufficient, in the dark for example
- Suitable for six-cell 12-volt lead acid or lead-gel batteries
- End-of-charge voltage for both batteries 14,2-volt, characteristic curve: IU

Display control panel (LT 320)

This display control panel connects directly to a corresponding Schaudt solar regulator.

- Displays the solar charging current for the living area or starter battery
- Compatible with the following Schaudt solar regulators: LR 1218, LRM 1218

Model	Input Voltage	Max Total Current	Charging Voltage		 Height	 Width	 Depth
Solar regulator (LRM 1218)	16 - 32 volts	20 amps	13,2 - 14,9 volts	360 gr	55 mm	148 mm	95 mm
Solar regulator (LR 1218)	16 - 25 volts	18 amps	14,2 volts	160 gr	110 mm	75 mm	56 mm
Panel (LT 320)	12 volts from LR(M) 1218	--	--	788 gr	106 mm	110 mm	35mm

CARAVAN POWER SUPPLY (230-VOLT AC / 12-VOLT DC)

Power supply units

Power supply units supply 12-volt equipment such as immersion pumps, fans, lights and similar devices. They are most commonly used for caravans connected to a 230-volt network and power the utilities from the vehicle battery for a limited amount of time.

CSV 300

- Output voltage: 12,5 volts DC;
Max output current: 24-amps
(permanent 18-amps)
- Five separately fused
12-volt current circuits
- Installation space (mounting
rail 35mm, 4TE) for 230-volt
basic distribution available
- Priority circuit for mains
supply, otherwise supply of
utilities from the car battery
- For operation without battery

CSV 300

CSV 400

- Output voltage 12,5-volt DC,
output current 32-amp
- Six separately fused
12-volt current circuits
- Priority circuit for mains
supply, otherwise supply of
utilities from the car battery
- Output voltage
stabilized and screened
- Connection option for water
tank monitoring control panel
- Connection option
for refrigerator supply

CSV 400

Model	Input Voltage	Max Total Current	Output Voltage	 Weight	 Height	 Width	 Depth
Power supply (CSV 300)	230 volt mains - 12 volt from car	Supply 24 amps	12,5 volt	1500 gr	84 mm	211 mm	227 mm
Power supply (CSV 400)	230 volt mains - 12 volt from car	Supply 32 amps	12,5 volt	2000 gr	111 mm	320 mm	217 mm
Battery charger (CSV 409), mains-switch (ST 05)	230 volt mains - 12 volt from car	Charging 28 amps	14,2 volt	2000 gr	111 mm	320 mm	217 mm
LED control panel (LT 100), water tank level probe (M400)	12-volt from CSV 409	--	--	85 gr	92 mm	150 mm	25 mm

CSV 409

Intended for use in autarkic caravans, our battery charging module features complete 12-volt distribution, fuse protection of the 12-volt current circuits, as well as other control and monitoring functions.

- Battery charging through 230-volt supply with 28-amp, characteristic curve IUoU
- Suitable for six-cell lead-acid and lead-gel batteries
- 8-amp charging booster for battery charging while driving
- Bistable mains latching relay (12-volt)
- Connection for solar controller LR 1218 / LRM 1218
- Automatic switch-off of utilities when ignition is switched on
- Optional control panel available (#2021104738)

CSV 409

LT 100

This LED panel is intended for operation in autarkic caravans and can be used with a CSV 409 charger. Connection material for CSV included in scope of delivery. Tank probes are also required.

- Voltage LED display in four levels for the living-area battery
- Optical battery alarm triggering in case of significant battery voltage drops
- Tank level gauge in four stages for domestic use water tanks
- 12-volt mains switch with switch-on control unit
- 230-volt network control unit

LT 100

ELECTRO BLOCK POWER SUPPLY FOR MOTORCARAVANS

- For use with motorcaravans
- EBL 208 for use with six-cell lead-acid and lead-gel batteries
- EBL 211 for use with six-cell AGM and lead-gel batteries
- Charging module: Characteristic curve IUoU, charging current 18-amp
- Bistable mains latching relay (12-volt) and battery monitor module
- Features a battery cutoff switch for winter storage
- Connection for a solar charge regulator LR(M) 1218

EBL 208

Electro block system control panel

- LED display panel can be mounted inside the motorcaravan
- Voltage displays in eight levels for living area and starter batteries
- An optical battery alarm will trigger if the battery voltage drops significantly
- Displays water tank level in four increments for up to two water tanks
- 12-volt mains switch with switch-on control unit
- 230-volt network control unit
- Pump switch with switch-on control unit

LT 453

Water tank level probe

- Measures fresh and wastewater tanks
- Quick, easy installation
- Optional cable, lock-nut and seal
- Tank depth: up to 400 mm

M400

Model	 Weight	 Height	 Width	 Depth
EBL 208	1900 gr	130 mm	275 mm	170 mm
EBL 211	1900 gr	130 mm	275 mm	170 mm
LT 453	173 gr	112 mm	180 mm	25 mm
M400	200 gr	--	60 mm	60 mm

BATTERY CHARGERS (230-VOLT AC / 12-VOLT DC)

- Charging current of 18-amps and characteristic curve IUoU
- Execution as primary switched-mode power supply
- Also for increasing the charge in systems with electro blocks
- Also for power supply and starter battery recharging
- LAS BUS provides temperature- compensated charging
- LEDs show the charging phase
- High-efficiency of approximately 90%
- A high charging current can be achieved without fans, with compact dimensions and low weight
- Charging characteristic curve also suitable for AGM (LAS 1218: lead-acid, lead-gel)
- Supply mode (12,5-volt)
- SDTBUS capable (LAS 1218 BUS only)
- Both chargers available with Schuko or Wago mains connector

LAS 1218-2

LAS 1218 BUS

Model		Height	Width	Depth
LAS 1218-2 Schuko	1000 gr	90 mm	150 mm	250 mm
LAS 1218-2 Wago	1000 gr	90 mm	150 mm	250 mm
LAS 1218 BUS Schuko (TF 25)	1000 gr	90 mm	150 mm	250 mm
LAS 1218 BUS Wago (TF 25)	1000 gr	90 mm	150 mm	250 mm

OVERVOLTAGE PROTECTOR

- Provides overvolt protection for 230-volt devices connected to the mains power source
- If overvoltage occurs, cut-off occurs within 10 milliseconds
- The devices remain switched off until the mains voltage is normal
- Two utility outputs
- Interrupting voltage Ueff:
<175 volts AC, >265 volts AC

OVP 01

Model	Total Current	Voltage		Height	Width	Depth
OVP 01	10 amps	230	1150 gr	73 mm	170 mm	193 mm

LIGHT SYSTEMS

- The button can be switched on and off through plus or minus
- Any buttons connected to the light system can be used as remote switches and dimmers for bulbs
- Accommodates connection of any number of buttons
- Compatible with most LED lights up to 10-amps
- Light systems up to 10 channels available

LIS 101

LIS 111

ACCESSORIES

Lippert offers a number of specialty accessories to maximize functionality on any caravan or campervan and truly turn it into a customized living space. Check out our propane and gas tank holders, furniture fittings and more.

**Whenever, wherever, we
make your experience better.**

PROPANE BOTTLE SUPPORT

- Holds two propane tanks up to 300 mm in diameter (15 kg max)
- Sliding rails for easy access and convenient storage
- Equipped with magnets and locking pin for stability during travel
- Mounts directly to the vehicle floor with self-tapping screws

Shown installed in cabinet
(cabinet and bottles not included)

Part #		
2020348797	16,6 kg	40 kg

GAS BOTTLE HOLDER

- Fits 250 mm and 310 mm bottles
- Installs in the gas bottle locker
- Compatible with the propane bottle support

Part #	 Width
2021115151	310 mm
2021107148	250 mm

GAS BOTTLE SPACER

- Creates space between gas bottles
- Made of durable plastic
- Compatible with gas bottle holders

Part #	 Height
2021107415	10 mm

PORTHOLE TOWEL HOLDER

- Steel construction with a durable chrome finish
- Installation hardware not included

Part #	 W	 H
2021103669	430 mm	205 mm

SEAT BELT FRAMES

- Seat bench for use in the dinette area, equipped with two safety belts kits and two isofix standard fixing systems.
- Available with a fixed or adjustable headrest

FURNITURE FITTINGS

- Constructed of durable plastic
- Finish is beige brown

COMPANY PROFILE

Guided by three generations of family leadership, Lippert has grown tremendously over the last several decades. Founded in 1956 by Larry Lippert, the company began as a galvanized and aluminum roofing business for the manufactured housing industry. Today, Lippert has evolved into an industry leader of premium components to the recreational vehicle, marine, automotive, commercial vehicle and building products industries.

VISION:

Make business a force for good in the world.

MISSION:

Making lives better by developing meaningful relationships with co-workers, customers and the community.
