

## BUNK LADDER

The Lippert bunk ladder offers a secure way for campers to reach their top bunk. With its telescoping feature, the ladder easily extends when needed, providing convenient access to the upper bunk. Its lightweight construction, combined with the telescoping capability, also ensures simple storage when not in use.

## SAFE, CONVENIENT BUNK ACCESS

### Pre-attached Brackets

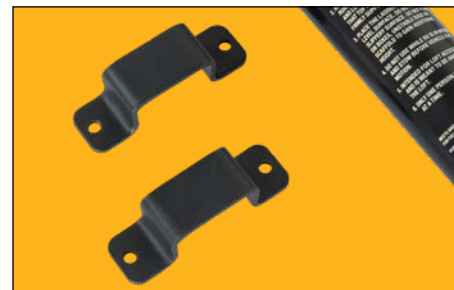

The ladder comes with two female attachment brackets for securing it to your bunk. With male brackets already pre-attached, you can easily mount the ladder directly onto the bunk's front panel without additional hardware.

### Release Buttons

Thumb release buttons on each rung allow the ladder to telescope down into a compact size when not in use for convenient storage.

### Mounting Brackets

The ladder and two included female attachment brackets can be attached to the front face of the bunk.

### Solid Footing

Molded rubber feet with aggressive relief pattern provide stability on various types of ground surfaces.

### Non-Slip Climbing

Grooved, 1.5" deep foot rungs supply plenty of traction when climbing.

### Telescopes for Easy Storage

The secure strap clasp keeps the telescoping ladder compact for convenient transport and storage.

### Additional Features

- Collapsible length can be used at a variety of heights, including 5', 6', and 7'
- Built to ANSI safety standards
- 250-lb. maximum weight capacity
- Made from lightweight extruded aluminum
- Ladder and (2) female attachment brackets included
- Eliminates the need for a permanent ladder in bunkhouse configurations
- Collapsed dimensions: 17-3/4" wide at widest point, 27" tall
- Expanded dimensions: 17-3/4" wide at widest point, 83-3/4" tall
- 12-1/2" rung to rung
