## 28-Bottle Dual-Zone Wine Cooler (Stainless)
EL-WCU113-03

The 28-Bottle Dual-Zone Wine Cooler conveys an allure of style and elegance. This premium wine cooler will allow you to store your collection in two different temperature zones divided by the digital control panel in the middle. The easy to use digital controller with a blue LED readout has an adjustable 24-degree temperature range (40-64°F) that allows users to select a proper, customized storage climate and serving temperature for both light and dark wine. It features 6 easy to slide out black wire racks that come with modern stainless steel lips that give easy access to every bottle in your collection. Larger bottles can be stored on the designated bottom rack with the specially designed racking. You can toggle on and off a blue LED light that can be found on the inside of the cooler and can be viewed through the all glass door. The cooling system uses compressor technology and utilizes automatic defrosting. This cooler is designed to be a worthy home for all of your finest bottles of wine. This wine refrigerator is rated for both residential and commercial use and comes in two different colors: Stainless Steel and Black.
