Item #	Inner	Master	UPC	Packaging
C28215	10	100	039564015441	Carded

- Use to remove the threaded die cast heater hose coupler that fails on most GM intake manifolds
- Simply drive the tool in the broken coupler with a small hammer and turn it counterclockwise to remove
- Splines cut their way into the broken coupler, use a 5/8 in. socket or wrench to turn the coupler out
- The die cast zinc couplers corrode and breaks where it's attached to the manifold on the engine block
- It's the perfect tool for the job, saving mechanics valuable time
