Electronic Specs: 1.2A/110V/140W

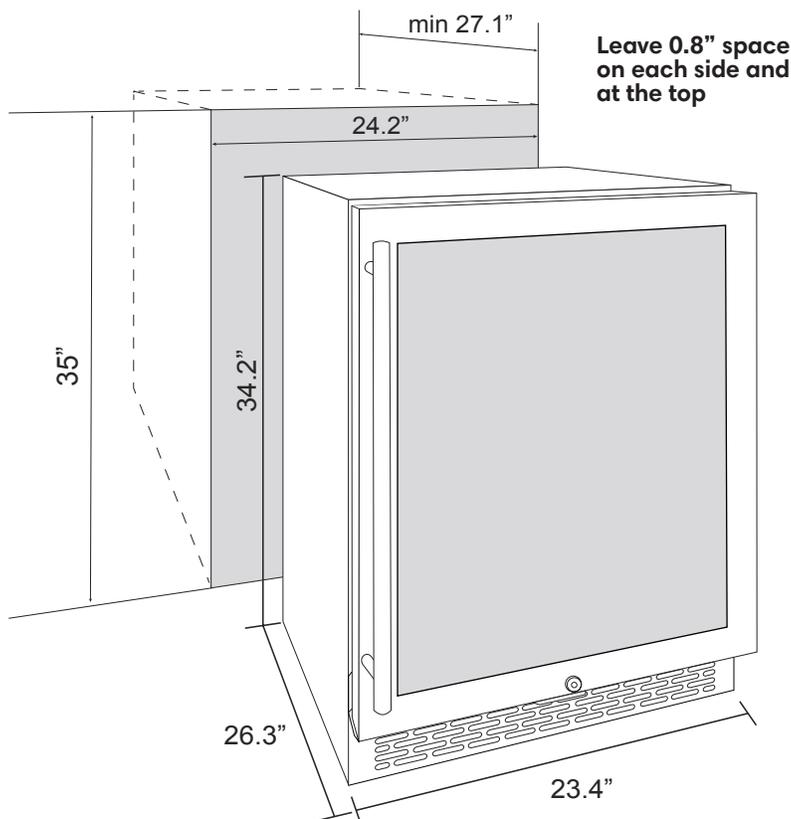

Control Type: Capacitive touch control

Capacity: 41, standard 750ml bottles

Door Swing Orientation: Reversible

Installation Specifications

- Place your wine cellar in the room of your choice and unpack it. To ensure optimal operation, choose an open and ventilated location, away from direct sunlight or any source of heat or humidity. Optimal operation of the device is planned for an ambient temperature between 41°F and 100°F. Higher or lower ambient temperatures may affect the internal temperature of the device. The shelves can be taken out. Some models require the doors to be opened more than 90° to pull out the shelves.
- Install your wine cellar on a flat and stable surface. Make sure, if your cellar is placed between two pieces of furniture or in a corner against a wall, that the door opens sufficiently so that the shelves can be taken out. Some models require the doors to be opened more than 90° to pull out the shelves.
- Wait at least 24 hours before starting the appliance, in order to allow the refrigerant circuit to be perfectly efficient.
- Plug the power cord of your wine cellar into a wall outlet.

FEATURES

- Sabbath mode
- Reversible door in field
- Temperature and door alarm
- Dual-pane glass door
- Adjustable beech wood shelves that extend 90%
- Temperature range: 39-68 °F (4-20 °C)
