

The diagram illustrates a 3D coordinate system with axes labeled x , y , and z . A rectangular prism is shown in the first octant, with its edges parallel to the axes. The prism is divided into several smaller rectangular regions by lines parallel to the axes. A vertical line is drawn along the z -axis, extending from the origin to the top of the prism.

QUESTION

The diagram illustrates a 3D coordinate system with axes labeled x , y , and z . A rectangular prism is shown in the first octant, with its edges parallel to the axes. The prism is divided into several smaller rectangular regions by lines parallel to the axes. A vertical line is drawn along the z -axis, extending from the origin to the top of the prism.

The diagram illustrates a 3D coordinate system with axes labeled x , y , and z . A rectangular prism is shown in the first octant, with its edges parallel to the axes. The prism is divided into several smaller rectangular regions by lines parallel to the axes. A vertical line is drawn along the z -axis, extending from the origin to the top of the prism.
