

## ATTACHED LEAF

Identify the parts of the leaf and label the diagram.

Part	Label	Function
1	A	Supports the leaf blade
2	B	Contains chloroplasts
3	C	Transports water and nutrients
4	D	Transports water and nutrients
5	E	Allows for gas exchange
6	F	Controls the opening and closing of stomata
7	G	Protects the leaf from damage
8	H	Prevents water loss
9	I	Stores water and nutrients
10	J	Contains chloroplasts
11	K	Transports water and nutrients
12	L	Transports water and nutrients
13	M	Transports water and nutrients
14	N	Protects the vascular bundle
15	O	Helps in the expansion and contraction of the leaf
16	P	Protects the leaf from damage
17	Q	Prevents water loss

Write the name of the part of the leaf and its function.

1. Identify the parts of the leaf and label the diagram.

2. Write the name of the part of the leaf and its function.

Part	Label	Function
1	A	Supports the leaf blade
2	B	Contains chloroplasts
3	C	Transports water and nutrients
4	D	Transports water and nutrients
5	E	Allows for gas exchange
6	F	Controls the opening and closing of stomata
7	G	Protects the leaf from damage
8	H	Prevents water loss
9	I	Stores water and nutrients
10	J	Contains chloroplasts
11	K	Transports water and nutrients
12	L	Transports water and nutrients
13	M	Transports water and nutrients
14	N	Protects the vascular bundle
15	O	Helps in the expansion and contraction of the leaf
16	P	Protects the leaf from damage
17	Q	Prevents water loss
