(2) Press key ⑤ about 3 seconds till the hour number blink to set the system time. Press the key ① or ② to adjust the hour number when the number is blinking. Then press the key ⑤ to switch to adjust the minute number when it is blinking. Also can press the key ⑤ to switch to adjust the month or date when the number blinking. System will accept the setting when the number stop blinking. (Time setting only can be adjusted when the Bluetooth function is shut off)

(3) Press key ④ to turn on the Bluetooth music play function. The upleft of screen will show the progress bar then display “1-bt” with blinking, the Bluetooth function come into be searched state. Open the Bluetooth function of your phone & search the device name of “K3015” to connect with it, “1-bt” would be stop blinking when the phone connect with system successfully. Now you can play any music of your phone in the system speakers via the Bluetooth function. Press the key ① or ② to choice the previous song or next song. Press the key ③ to adjust the volume, then press the key ① and ② to increase or decrease the volume when it is blinking.

1. Don't close to the magnetic and electric field, and avoid the direct light and heating appliance.
2. As the mobile wifi and bluetooth are using the same channel, the signal and data may interence each other when use together. Herein the download speed will be slow. If listen to the music on line, the slowing download will cause the problem of intermittent music playback
3. Due to the different version from bluetooth module manufacturers, some mobile phones may have the playing jam or connection lost problems.
4. The longest connection distance of Bluetooth 10 Meters is a theoretical distance without any barrier. In fact, it should be 2 to 8 meters under the actual environment. The human body is a main barrier so please make sure the blue tooth speaker is kept within 10 meters away from the mobile phone and without any barrier such as wall or other electrical appliance.
5. Need to re-connect the Blue tooth signal by hand if it is disconnected,
6. There will be slight sounds when the blue tooth signal is connected. It is normal.
