

1. The first step in the process is to identify the problem or goal. This involves understanding the current situation and what needs to be achieved.

2. Once the goal is clear, the next step is to develop a plan. This includes determining the resources needed, the timeline, and the specific actions to be taken.

3. After the plan is in place, it's time to execute. This involves putting the plan into action and monitoring progress along the way.

4. Finally, the process concludes with evaluation. This step involves reviewing the results against the original goal and identifying any lessons learned for future reference.

Open Ended

The diagram shows two rectangular prisms. The top one is a standard rectangular prism. The bottom one is a rectangular prism with a semi-circular cutout on its top surface.

This diagram illustrates a geometric shape that is a rectangular prism with a semi-circular cutout on its top surface.
