

PROCESSES

The following processes are used in the production of the product:

- 1. Raw material selection
- 2. Pre-treatment of materials
- 3. Mixing and blending
- 4. Extrusion and shaping
- 5. Drying and curing
- 6. Finishing and packaging

Process	Duration	Temperature
1. Raw material selection	10 min	25°C
2. Pre-treatment of materials	15 min	120°C
3. Mixing and blending	20 min	150°C
4. Extrusion and shaping	30 min	200°C
5. Drying and curing	45 min	180°C
6. Finishing and packaging	15 min	25°C

CONCLUSION

The results of the study show that the product is highly effective in treating the condition. The process is simple and easy to follow, and the product is safe for use. The product is available in various forms and sizes to suit different needs. The product is also available in different flavors to make it more appealing to the user. The product is a good choice for anyone looking for a safe and effective treatment for the condition.
