

# Safety ( ${ }^{155}$ 

## Grow and Go Extend N Ride

## All-in-One Convertible Car Seat

Your model may look different than one shown on cover.

Read all instructions BEFORE USING this car seat. KEEP INSTRUCTIONS FOR FUTURE USE.
$\triangle$ Failure to follow the warnings on the labels and in the instruction manual can result in serious injury or death to your child.

Welcome to the Safety 1st Family!
Thank you for choosing this car seat, also known as a child restraint!

To help you get started using your child's new car seat, here are the 4 main tasks you'll need to complete.

Your child's safety is worth the time it will take to read and follow these instructions.

Ready? Let's go!
Pages 1-4 will introduce you to the parts of the car seat.

The Back Cover of this Manual has our contact information.
If at any point you would like assistance, please feel free to reach out to us.

## Parts of Car Seat

*See pages 3-4 for Accessory Use.
 Tether Storage Attachment

## Accessory Use

Snack Lid

Removable Cup Holder(s) \& Snack Lid
(on select models)

## For Use in All Modes

The cup holder(s), snack lid, and snack tray are top-rack dishwasher safe.

To remove cup holder, twist the cup holder counterclockwise. Pull it out of the slot in the car seat.
To remove snack lid, pull it off the top of the cup holder.

Head Pillow \& Body Pillow

## Only For Use in

 Rear-Facing ModeThe head and body pillows must be used together.
To remove head pillow, pull it out from behind the body pillow.

To remove body pillow, undo the buckle and pull it through the slot in the pillow. Slide the pillow out from behind the harness straps.
If using the lower shoulder harness slots for smaller infants, see page 45-47.

## Buckle Cover

For Use in Rear-Facing Mode or Forward-Facing Mode

To remove, undo the buckle and pull the buckle cover off the buckle.

## Harness Covers

Harness covers help provide comfort to the neck.
If the harness covers will not allow proper positioning of the chest clip or interfere with getting a tight enough harness fit for a smaller baby, remove and do not use.
Store until your child is large enough to use these harness covers while maintaining a properly fitting harness.

To remove harness covers, pull the fastening strips apart and pull them off of the harness strap.

## Choosing Car Seat Mode

## AWARNING:

Measure your child's weight and height (DO NOT guess) before choosing this car seat's mode.

Your child's height, weight, and age determine how the car seat should be placed in the vehicle.

Children vary widely in body size, shape, and temperamentplease consult your doctor before switching between any modes within the limits and fit requirements of the car seat.

## Provincial Laws

Please be certain to follow your province's laws regarding car seat use.

## American Academy of Pediatrics Recommendations

## Infants and Toddlers

Should ride in a rear-facing car seat as long as possible, until they reach the highest weight or height allowed by their car seat.

## Toddlers and Preschoolers

Once they are facing forward, children should use a forwardfacing car seat with a harness for as long as possible, until they reach the height and weight limits for their car seats.

## School-Aged Children

Once they have outgrown their forward facing car seat, children should use a belt-positioning booster seat until the vehicle's lap and shoulder seat belt fits properly. This is often when they have reached at least 4 feet 9 inches in height and are 8 to 12 years old.

## Older Children

All children younger than 13 years should be restrained in the rear seats of vehicles for optimal protection.

## Booster Seat Mode

$18-45 \mathrm{~kg}$ (40-100 lb) and 110-132 cm (43-52 in.)

## Booster Seat Section <br> PAGE 32

Storing Harness System PAGE 34

Booster Seat Use in Vehicle PAGE 37

## Rear-Facing Section

Children under 1 year of age MUST ride Rear-Facing.

In this car seat, your child can remain Rear-Facing until they outgrow any one of the following:

- Weight Limit: $18 \mathrm{~kg}(40 \mathrm{lb}) ;$ OR
- Height Limit: 102 cm (40 in.); OR
- Rear-Facing Child Fit requirements, see page 9.

Before installing the car seat in your vehicle, check your child's fit in the car seat.
This way you won't have to redo the vehicle installation to make adjustments to the car seat.
Rear-Facing Child Fit: Page 9
Rear-Facing Vehicle Install: Page 11

## A WARNING:

NEVER install a rearfacing child restraint in the front seat of a vehicle equipped with an active frontal airbag.

DO NOT use the tether for rearfacing mode. Secure the tether strap hook to its storage attachment.

DO NOT use the UAS belt along with the vehicle lap or lap/shoulder belt.

DO NOT fasten multiple UAS hooks on the same UAS bar in the vehicle.

Check the vehicle belt or the UAS belt before each use. Use ONLY if the belt can be tightened properly and locked securely in place.

Even when unoccupied, this child restraint MUST be firmly secured to the vehicle with the UAS belt or with the vehicle seat belt.

This child restraint MUST ALWAYS face the rear of the vehicle until the child is at least 1 year old and weighs $10 \mathrm{~kg}(22 \mathrm{lb})$.

Fully Loosen Harness Straps
Push down on the harness release lever (through the opening in the pad) while pulling out on the harness straps as shown.

Undo Chest Clip \& Buckle

Place Harness Straps Out of the Way
The In and Out Harness Holders can be used two ways:

1. You can secure the harness straps around them as shown.
2. Or the buckle tongues can be placed into the slots in the harness holders as shown.

## Check Head Position

The top of your child's head must be at least
2.5 cm (1 in.) below the top of the car seat's headrest.

## Check Harness Strap Position

The harness strap MUST be at or slightly below the shoulders; never above.

Check Buckle Position

- Use the slot closest to your child.
- The buckle should not be underneath or behind your child.
Do not use 3rd slot in Rear-Facing Mode.

To change the harness strap height, see page 41.

To change the buckle position, see page 42.

To learn how to check harness tightness, see pages 29-30.

If you cannot achieve a snug harness fit for your child, see pages 44-47.

## There are 2 different methods for install. Use only one:

Before installing the car seat in your vehicle, check to see if you need to adjust the buckle position for your child. See page 9 for child fit.
Once the car seat is installed, you will not be able to adjust the buckle position.

## Review Vehicle Owner's Manual

Determine what kind of vehicle belts your car has and how to use them to lock a car seat in place OR where UAS anchor seating positions are located in your vehicle.

UAS Belt
Vehicle Belt

## A WARNING:

DO NOT use both the UAS belt and vehicle belt at the same time to install the car seat.

## Rotate Footrest Out of Way For Now

You will make adjustments to the footrest AFTER the car seat is installed.
For more information about using the footrest, see page 49.

Place Car Seat Rear-Facing in Back Seat
The car seat base must be flat on the vehicle seat.

## Recline Car Seat \&

## Check Rear-Facing <br> Level Line

The level line on shell MUST be parallel with ground using either position 3 or 2.

Locate Rear-Facing Belt Path

## \& Route Vehicle Belt or UAS Belt Through It

For the UAS belt: You may need to fully lengthen the belt before routing it into the belt path. Squeeze the adjuster button and pull the belt out as shown.

Vehicle Belt or UAS Belt Goes:

- under the car seat pad; AND
- across the car seat; AND
- in front of the buckle; AND
- out the other Rear-Facing Belt Path opening.
Do not twist belt.

Adjuster

## Finished UAS

 Belt RoutingThe adjuster can be on either side of the car seat.

## Buckle Vehicle Belt

If your car has a switchable retractor, use it to lock the vehicle belt. Review page 57 of this manual or your vehicle owner's manual.

## Tighten Belt

Place your hand in the car seat and firmly push the car seat down and back towards the vehicle seat. Pull the belt towards you and parallel (in line) with the belt path as shown.
For the UAS belt or Lap Only Vehicle Belt: it may be easier to tighten if you route the free end of the belt back into the RearFacing Belt Path, reach into the Rear-Facing Belt Path, and pull the free end of the belt towards you.

Check Belt Tightness
Hold the Rear-Facing Belt Path with your non-dominant hand. Push and pull the car seat from side to side.
It should not move more than 2.5 cm (1 in.).

If the car seat moves more than 2.5 cm (1 in.), you can try:

- Pulling the belt tighter; OR
- Reinstalling the car seat; OR
- Changing to a different seating location; OR
- Switching to a different install method (UAS or vehicle belt).

## Adjust Footrest

Use one of the 4 Rear-Facing footrest positions to put the footrest as flush against the vehicle seat as possible.
The footrest does not need to touch the back of the vehicle seat; there can be a small gap.

## FINISHED!

Lap Belt

UAS Belt
$\sqrt{\boxed{ }}$ Vehicle Belt Install: Is the vehicle belt locked? See step 6.UAS Belt Install: Are the hooks securely attached to the vehicle's UAS Belt? See step 6.

Is the belt tightened enough so that the car seat does not move more than 2.5 cm ( 1 in .) from side to side? Check the tightness of the install often to make sure it has not loosened. See steps 7 and 8.

If your child cannot sit up unassisted, is the Rear-Facing Level Line parallel with the ground? See steps 3 and 11.

Is the footrest in either position $1 \mathrm{~A}, 1 \mathrm{~B}, 1 \mathrm{C}$ or 1 D ? See step 9 .

## Forward-Facing Section

## A WARNING:

DO NOT use the UAS of the child restraint anchorage system (UAS system) to attach this child restraint when restraining a child weighing more than $18 \mathrm{~kg}(40 \mathrm{lb})$.

The vehicle belt MUST be used for installation if your child weighs more than $18 \mathrm{~kg}(40 \mathrm{lb})$.

You MUST ALWAYS attach, adjust, and secure the tether (top anchorage) strap when installing the car seat in the Forward-Facing Mode with internal harness.

DO NOT use the UAS belt along with the vehicle lap or lap/shoulder belt.

Check the vehicle belt or the UAS belt before each use.

Use ONLY if the belt can be tightened properly and locked securely in place.

DO NOT fasten multiple UAS hooks on the same UAS bar in the vehicle.

Even when unoccupied, this child restraint MUST be firmly secured to the vehicle with the UAS belt or with the vehicle seat belt.

In this child restraint your child MUST be at least 1 year old and weigh $10 \mathrm{~kg}(22 \mathrm{lb})$ before they sit forward-facing.

## Forward-Facing Child Fit

 be used two ways:
You can secure the harness straps around them as shown, or the buckle tongues can be placed into the slots in the harness holders as shown.

## 5

Head Position
The tops of your child's ears MUST be below the top of the car seat's headrest.

Harness Strap
Position
The harness strap MUST be at or slightly above the shoulders; never below.

## Buckle Position

- Use the slot closest to your child.
- The buckle should not be underneath or behind your child.

The buckle can be used in any buckle slot.

To change the harness strap height, see page 41.

To change the buckle position, see page 42.

To learn how to check harness tightness, see pages 29-30.

If you cannot achieve a snug harness fit for your child, see pages 44-47.

## Forward-Facing Vehicle Install

There are 2 different methods for install.

## Use only one:

Vehicle Belt
for children up to $30 \mathrm{~kg}(65 \mathrm{lb}) \quad$ for children up to $18 \mathrm{~kg}(40 \mathrm{lb})$

## AWARNING:

DO NOT use both the UAS belt and vehicle belt at the same time to install the car seat.
You MUST ALWAYS attach, adjust, and secure the tether (top anchorage) strap when installing the car seat in the ForwardFacing Mode with internal harness.
 Car Seat ForwardFacing in Back Seat

The vehicle seat back must be upright.

Lift Tether Adjuster to Loosen Tether Strap

Loosely Attach Tether Hook to Vehicle's Top Tether Anchor

Locate Forward-Facing Belt Path \&
Route Vehicle Belt or UAS Belt Through It
For the UAS belt: You may need to fully lengthen the belt before routing it into the belt path. Squeeze the adjuster button and pull the belt out as shown.

- out the other Forward-Facing Belt Path opening.
Do not twist belt.

## Vehicle Belt or UAS Belt Goes:

- under the car seat pad; AND
- across the car seat; AND

Adjuster

## Finished UAS

 Belt RoutingThe adjuster can be on either side of the car seat.

## Buckle Vehicle Belt

If your car has a switchable retractor, use it to lock the vehicle belt. Review page 57 of this manual or your vehicle owner's manual.

Attach UAS Connectors to Vehicle's UAS

Anchors

Tighten Belt
Place your hand in the car seat and firmly push the car seat down and back towards the vehicle seat. Pull the belt towards you and parallel (in line) with the belt path as shown.

For the UAS belt or Lap Only Vehicle Belt: it may be easier to tighten if you route the free end of the belt back into the Forward-Facing Belt Path, reach into the Forward-Facing Belt Path, and pull the free end of the belt towards you.

Tighten Tether
Push firmly on the back of the car seat and pull the free end of the tether strap to remove all of the slack.

## Check Belt Tightness

Hold the Forward-Facing Belt Path with your nondominant hand. Push and pull from side to side.
It should not move more than 2.5 cm (1 in.).

If the car seat moves more than 2.5 cm (1 in.), you can try:

- Pulling the belt tighter; OR
- Reinstalling the car seat; OR
- Changing to a different seating location; OR
- Switching to a different install method (UAS or vehicle belt).

## Adjust Footrest

Use the Forward-Facing footrest arm and footrest positions that best fits your child. You may also place the footrest into the storage position. In position 2 or 3 footrest MUST NOT be angled higher than parallel to the vehicle floor.

## Forward-Facing Mode Footrest Use

2 or 3
\& any footrest position that best fits your child.

## Storage

For more information about using the footrest, see page 49.

In position 2 or 3 footrest MUST NOT
be angled higher than
parallel to the vehicle be angled higher than
parallel to the vehicle floor.

## FINISHED!

## Lap/Shoulder Belt + Tether for children up to $30 \mathrm{~kg}(65 \mathrm{lb})$

Lap Belt + Tether for children up to $30 \mathrm{~kg}(65 \mathrm{lb})$

UAS Belt + Tether
for children up to $18 \mathrm{~kg}(40 \mathrm{lb})$

Vehicle Belt Install: Is the vehicle belt locked? See step 7.

UAS Belt Install: Are the hooks securely attached to the vehicle's UAS Anchors? See step 7.

Is the belt tightened enough so the car seat does not move more than $2.5 \mathrm{~cm}(1 \mathrm{in})$ from side to side? Check the tightness of the install often to make sure it has not loosened. See steps 8 and 10.

V
Has the tether been installed and tightened? See steps 4 and 9.

V
Is the footrest in a position that best fits your child? See step 11.

## Securing Child in Car Seat

## Position Chest Clip

Slide chest clip up the harness straps and position it at mid-chest (even with armpits) and away from your child's neck.

Check Harness Tightness
Unfasten harness covers.
Try to pinch the harness at the shoulders vertically between index finger and thumb as shown.

If your fingers slip off, the harness is tight enough.

If you can pinch the harness strap, tighten more.

A snug strap should not allow any slack.
It lies in a relatively straight line without sagging.

It does not press on the child's flesh or push the child's body into an unnatural position.

## FINISHED!

Your child is now secured in the car seat. Check your child's fit often and make any needed adjustments to the car seat as they grow.

To Remove Child from Car Seat:

1. Loosen Harness Strap
2. Unbuckle Harness
3. Release Chest Clip
4. Remove Child

## Troubleshooting

1. If the buckle or harness release lever sticks: DO NOT
lubricate. Check for dropped food, sticky spilled drinks, dirt, leaves, etc.

Clean with warm water and/or remove the object with tweezers. If you cannot get the harness to adjust and remain tight with the buckle securely locked, do not use this car seat.

## 2. If your harness twists:

Straighten the harness each time you put your child in the car seat. Lock the buckle and tighten the harness so it will be ready for next use.

## AWARNING:

Failure to fasten and tighten the harness system correctly may allow the child to be ejected from the child restraint in a crash or sudden stop causing serious injury or death.

DO NOT mistake comfort for safety. The harness system must be snugly adjusted.

DO NOT put snowsuits or bulky garments on your child when placing them in the child restraint.

Bulky clothing can prevent the harness straps from being tightened properly.

## Booster Seat Section

$18-45 \mathrm{~kg}(40-100 \mathrm{lb})$ and 110-132 cm (43-52 in.)

In this car seat, your child can remain in a Booster
Seat until they outgrow any one of the following:

- Weight Limit: $45 \mathrm{~kg}(100 \mathrm{lb})$; OR
- Height Limit: $132 \mathrm{~cm}(52$ in.); OR
- Booster Seat Child Fit requirements, see page 40

You MUST store the harness system and remove the accessories (except the cup holders and/or snack lid) when using the Booster Seat Mode. To remove accessories, see pages $3-4$. Keep the booster seat securely belted even when unoccupied.
Storing Harness System: Page 34
Booster Seat Use in Vehicle: Page 37
Booster Seat Child Fit: Page 40

## A WARNING:

DO NOT use the harness system when using as a booster seat.

DO NOT use UAS when using as a booster seat. Secure the UAS belt and the tether strap to their storage attachments.

Use ONLY the vehicle's lap and shoulder belt system when restraining the child in this booster seat.

DO NOT use only the lap belt when using this seat as a booster seat. The shoulder belt must always be adjusted snugly across the child's chest.

NEVER place shoulder belt under the child's arms or behind their back.

DO NOT use this booster seat if the tops of your child's ears are above the top of the booster seat's headrest.

The booster seat, even when unoccupied, must be firmly secured to the vehicle.

## Storing Harness System

34

## 5

Undo Fasteners on Headrest Pad \& Seat Pad

Pull Headrest Pad Off Bottom of Headrest

Thread Harness Straps into Slots on Sides of Headrest

## Booster Seat Use in Vehicle

## Put Booster Seat into Position 1

The vehicle seat back must be upright.
Only use the semi-reclined position if necessary to install the booster seat flush against the vehicle seat back.
Vehicle seat back must be upright.

If your vehicle has a headrest that interferes with a flush car seat fit, check your vehicle owner's manual to see if it can be removed, adjusted, or if there are other possible seating locations for you to install.

2

## Adjust Footrest

Use the Booster Seat footrest arm positions 2 or 3 and any footrest position that best fits your child. You may also place the footrest into the storage position. In position 2 or 3 footrest MUST NOT be angled higher than parallel to the vehicle floor.

5

## Buckle Vehicle Belt

Pull the lap belt to tighten.

Position Shoulder Belt on Child
Thread the shoulder belt through the beltpositioning guide in the headrest.
Pull the shoulder belt up to tighten so that it lies snugly across the center of your child's shoulder and across their chest.

FINISHED!

## Booster Seat Child Fit

Head Position
The tops of your child's ears should never be above the top of the booster seat's headrest.

Car Position
DO NOT use the booster seat if your child's head is less than 12.7 cm ( 5 in .) below the roof of the car. Consult your vehicle manual for proper seatbelt usage.

Shoulder Belt Position
The shoulder belt should lay snugly across the center of your child's shoulder and across their chest.

## Lap Belt Position

The lap belt should lay snugly across your child's hips, not on their stomach.

## Fully Loosen <br> Harness Straps

Push down on the harness release lever (through the opening in the pad) while pulling out on the harness straps as shown.

## Adjust Headrest/Harness Height

1. Squeeze the adjustment handle lever up.
2. Move the headrest up or down to the proper height for your child.
3. Release the handle to lock in place.
4. Make sure it is locked securely.

For Rear-Facing Child Fit, see page 9 .

For Forward-Facing Child Fit, see page 20.

To learn how to check harness tightness, see pages 29-30.

If you cannot achieve a snug harness fit for your child, see pages 44-47.

Check the harness straps often for any wear or damage.

## Changing Buckle Position

## A WARNING:

Failure to place
buckle's metal retainer completely through pad and child restraint can result in serious injury or death.

Unbuckle Harness
Press in towards the top of the red button.

Recline Car Seat
Reach under the car seat. Rotate the buckle's metal retainer and push it up through the car seat.

From Top of Car Seat, Pull Buckle \& Buckle Cover Out of Car Seat
\& Pad

Insert Buckle's Metal Retainer into Buckle Slot Closest to Child

Tuck the ends of the buckle cover into the same pad slot as the buckle.

5

## Reach Under Car Seat Between Base \& Car Seat

Pull the buckle's metal retainer completely through the seat pad and car seat.

Check Buckle
Pull up on the buckle to make sure it is secured.

The buckle MUST NOT pull out.

For Rear-Facing Child Fit, see page 9 .

For Forward-Facing Child Fit, see page 20.

To learn how to check harness tightness, see pages 29-30.

If you cannot achieve a snug harness fit for your child, see pages 44-47.

Harness System Adjustments for Smaller Infants

If you cannot achieve a snug harness fit for your child, you may need to adjust the buckle strap and/or harness strap length and location as shown in this section.

## AWARNING:

The harness system MUST BE installed correctly. DO NOT use a child restraint with damaged harness straps.

Adjusting Buckle

With Buckle in 1st Slot, Fully Recline Car Seat

If you need to move the buckle to the 1st slot, see pages 42-43.

Pull Front of Car Seat Pad Up

Reach Under Car Seat
Pull the buckle's metal retainer down and then push it up into the middle slot as shown.

Adjusting Harness Straps

When using the lower shoulder harness slots for smaller children, you must use the head and body pillow and the headrest must be in the lowest position.

Adjust Headrest to Lowest Position \& Fully Loosen Harness Straps

From Back of Car Seat, Remove Harness Strap Loops From Splitter Plate

The sewn ends of the harness strap loops MUST face towards you.
DO NOT twist the harness strap or the harness adjustment strap.
Make sure the same harness strap loops are fitted completely on both sides of the splitter plate.

To return the harness straps to upper shoulder harness slots, follow the steps below to rethread them.

1. Remove harness strap loops from splitter plate \& pull harness straps out of lower shoulder harness slots in body pillow \& car seat

2. Thread harness straps into upper shoulder harness slots
in car seat

3. From back of car seat, thread harness straps over metal bar
4. Attach 1st harness strap loops to splitter plate

If harness straps have been removed from chest clip \& buckle, rethread them:

The harness strap ends go through the back of the buckle tongues \& through the chest clip front to back.

## Reclining Car Seat

This car seat has 3 positions.

Rear-Facing Mode - 3 Reclined or 2 Semi-reclined
The level line on shell MUST BE parallel with the ground using either position 3 or 2.

Forward-Facing Mode - 1 Upright or 2 Semi-reclined ${ }^{*}$
Booster Seat Mode - 1 Upright or 2 Semi-reclined ${ }^{\star}$

To Recline: Pull out on the recline handle and push the top
 of the car seat back.

For More Upright: Pull out on the recline handle and pull the top of the car seat forward.

Using Footrest

You do not need to remove the harness system to remove the pad from the car seat.

DO NOT fully pull the harness strap out of the car seat. Leave it threaded in the hip harness slots. If removed, you will not be able to rethread it.

To remove accessories, see pages 3-4.

## Removing Seat Pad Set

## Cleaning Parts of Car Seat \& Installing Seat Pad Set

## Cleaning Pad and Accessories

Machine wash separately with cold water on a gentle cycle. Make sure the harness covers are closed so the fastening strips are not exposed. DO NOT use bleach. Tumble dry separately for 10-12 minutes on low heat. Remove immediately.

## Cleaning Harness Strap

Check the harness straps often for any wear or damage. Spot clean using warm sudsy water and damp cloth. Spilled food and liquids on the car seat may result in mold or bacterial growth over time. These spills could also attract insects or rodents.

## Cleaning Buckle \& Car Seat

Spot clean using warm sudsy water and damp cloth. DO NOT submerge into water.

## Installing Seat Pad Set

1. Lower Headrest to Middle of Car Seat
2. Pull Seat Pad Around Headrest and onto Car Seat
3. Pull Headrest Pad on to Headrest
4. Push Headrest Pad Fabric Tab into Slot in Headrest
5. Attach All Pad Fasteners

## AWARNING:

DO NOT fully pull the harness strap out of the car seat. Leave it threaded in the hip harness slots. If removed, you will not be able to rethread it. DO NOT use the child restraint without the seat pad or with damaged harness straps.

Your vehicle's features may be considerably different than those pictured here.

The UAS (Universal Anchorage System) is a universal system for installing child restraints without using vehicle seat belts.
The UAS can ONLY be used in vehicles that have the UAS bars installed in designated seating positions. Most vehicles manufactured after September 2002 are equipped with UAS bars.
Check your vehicle owner's manual to see which seating positions may be equipped with UAS bars.

UAS Belt Storage Location

## Adjuster

Hooks

## UAS

Belt Parts

## To Remove UAS Belt from Storage Location on Car Seat:

Press the red release button on each connector, then pull the connectors off of storage attachments.

## To Remove UAS Belt from Vehicle UAS Bars:

Press the red release button on each connector, then pull the connectors out of the vehicle seat bight.

## To Store UAS Belt

The UAS belt MUST be properly stored in its storage location when:

- using the vehicle belts to install the car seat; OR
- using the Booster Seat Mode; OR
- the car seat is not installed in a vehicle.

Thread UAS belt through rear-facing belt path then attach connectors to storage attachments as shown. Gently tighten the belt to remove slack.

## AWARNING:

DO NOT use both the UAS belt and vehicle belt at the same time.

## Vehicle Belts

Your vehicle's features may be considerably different than those pictured here.
If UAS belt is not an option or if your child weighs more than $18 \mathrm{~kg}(40 \mathrm{lb})$, you must use the vehicle seat belt system to install the car seat.
Not all vehicle belts and seating positions will work with car seats. Please go through the steps following steps to understand how to lock a car seat in Rear-Facing Mode or Forward-Facing Mode with a vehicle belt.

## You MUST Review Your Vehicle Owner's Manual

Your vehicle owner's manual will let you know which vehicle belts and seating positions car seats can be installed in.

## Check How This Car Seat Will Be Locked Into Place

The vehicle belt MUST NOT loosen after tightening.

This means there needs to be a way to lock the vehicle belt.

The ways this can be done are:

- By using the seat belt's retractor (see step 3); OR
- By using the seat belt's UAS plate (see step 4).

## Switchable Retractor

(most vehicles have this type)
This retractor can be switched to a locking mode.
You must have the retractor in the locking mode to use the seat belt with this car seat.
Switching to locking mode: Slowly pull the shoulder belt all the way out, then let it go back in 2.5-5 cm (1-2 in.).
As it goes back in, you will most likely hear a ratcheting sound.
Gently pull the belt to see if it has locked. You will not be able to pull any more belt out if the lock has engaged.

## Automatic Locking Retractor

This retractor always locks.
It will automatically lock after slowly pulling the seat belt out at least halfway and letting the belt go back into the retractor 2.5-5 cm (1-2 in.).

## Emergency Locking Retractor

## See Step 4 "Check LATCH Plates"

If the retractor does not lock, it is most likely an Emergency Locking Retractor. These retractors only lock during a sudden stop or collision.
You will need to determine if your seat belt's LATCH plate can lock the belt. See step 4, "Check the LATCH Plates".

## Check LATCH Plates

Latch plates are the part of the seat belt that goes into the buckle.

To see if the latch plate locks:
Buckle the vehicle belt.
Then firmly tug the lap portion of the seat belt while pulling it up.

If the vehicle belt does not slide through the latch plate, it's locked.

If the latch plate slides up and down the vehicle belt, it is a sliding latch plate.
Sliding latch plates easily slip between the lap and shoulder portions of the belt.

If you have an Emergency Locking Retractor with a Sliding LATCH Plate, you must use a locking clip.
Please contact us for one, see the back cover of the manual.

## Never Use the Following With This Car Seat:

- Emergency Locking Retractor Lap Only Belt
- Inflatable Seat Belts

## Top Tether

Your vehicle's features may be considerably different than those pictured here.
You must always attach, adjust, and secure the tether (top anchorage) strap when installing the car seat in the Forward-Facing Mode with internal harness. Tethers improve the installation and stability of car seats and reduce the risk of injury. Attach the tether hook to the tether anchor designated by your vehicle manufacturer for that seating position. Check your vehicle owner's manual for more information. If the seating position does not have a tether anchor, use a different seating position or see your dealer or a qualified mechanic and have one installed.

## AWARNING:

Using this child restraint without the tether strap anchored as required by the manufacturer would be a misuse of the child restraint and, in a sudden stop or crash, could result in serious injury or death.
DO NOT fasten multiple tether hooks on the same tether anchor in the vehicle.

## Storing Top Tether Strap

The tether strap MUST be properly stored in its storage location when:

- installing in Rear-Facing Mode; OR
- using the Booster Seat Mode; OR
- the car seat is not installed in a vehicle.

Attach the tether hook to its storage location as shown. Gently tighten to remove slack.

## Child Restraint Use

## AWARNING:

NEVER take your child out of the child restraint while the vehicle is moving.

NEVER leave your child unattended. Placing your child in a hot child restraint may result in burns.

DO NOT use a child restraint with damaged or missing parts.

DO NOT use a child restraint with cut, frayed, or damaged harnesses.

DO NOT substitute parts or try to modify the child restraint in any way. DO NOT lubricate buckles and fasteners.

DO NOT use any child restraint accessory except those approved by Dorel Juvenile Group.

NEVER allow any child to play with this child restraint; it is not a toy.

DO NOT remove or cover up any of the warning labels or other labels on the child restraint.

This child restraint has been certified for use in passenger vehicles. DO NOT use in a boat, on a motorcycle or in a cargo van or bus where there are no seat belts or tether anchors.

Read all instructions for additional warnings.

## Vehicle Seating Position

## A WARNING:

NEVER place a child rear-facing in a seating position with an active frontal air bag.

Check the vehicle owner's manual for more information about air bag/child restraint use.

Use the child restraint only on vehicle seats that face forward.

DO NOT use on seats that face the sides or rear of the vehicle.

For vehicles without a back seat, refer to your vehicle owner's manual.

Children are safer when properly restrained in rear seating positions than in the front seating positions.
According to accident statistics, children in rear seating positions are statistically safer, whether you have air bags, advanced air bags, or no air bags at all.

If you are not sure where to place the car seat in your vehicle:

- Consult your vehicle owner's manual; OR
- Contact Dorel Juvenile Group Consumer Care Department; OR
- Visit your local Child Passenger Inspection Station. Go to http://www.safercar.gov/cpsApp/cps/index.htm to find your closest station.

## Installation in Vehicle

To avoid your child being seriously burned, take the following precautions:

- Park in the shade or where the sun does not directly hit the car seat.
- Cover the car seat with a sheet or blanket when not in use.
- Check for hot seat and buckles before placing child in car seat.

To help protect your vehicle seat's upholstery from damage: you may use an accessory approved by Dorel Juvenile Group or a single layer towel underneath and behind car seat.

## Transport Canada Regulations

Transport Canada Road Safety Directorate regulates children's restraint systems under the Motor Vehicle Restraint Systems Safety Regulations (RSSR). The regulations require the manufacturer and/or importer to certify the restraint to the applicable safety standards and place specified warnings and information on the labels fastened to each restraint and in this instruction manual.

## AWARNING:

Check the vehicle belt or UAS belt before each use. Use only if the belt can be tightened properly and locked securely in place.

Even when unoccupied, this child restraint MUST be firmly secured to the vehicle with the UAS belt or with the vehicle seat belt.

Even when unoccupied, this booster seat MUST be firmly secured to the vehicle with the vehicle seat belt.

In a crash or sudden stop, an unsecured child restraint or booster seat could injure occupants.

## Replacement \& Expiration

## DO NOT risk your child's safety.

To keep your child as safe as possible, Dore Juvenile Group strongly recommends replacing the car seat even after a minor crash; even if it was not occupied at the time.

## Replacement After a Minor Crash

The National Highway Traffic Safety Administration states that for a crash to be considered minor ALL of the following MUST be true:

- Vehicle able to drive away from the crash site; AND
- Vehicle door nearest the car seat was not damaged; AND
- No passengers were injured; AND
- Airbags did not deploy; AND
- There is no visible damage to the car seat.

If the crash your car seat was involved in meets ALL the criteria, you may not need to replace the car seat.

If one or more of these criteria are not true or if you are uncertain of any of your answers, replace the car seat immediately.

## Replacement After a Moderate to Severe Crash

You MUST replace this car seat if it has been in a moderate to severe car crash.

This car seat is intended to protect a child in a single crash. During a crash, the car seat and all of its parts absorb crash energy which can deform or weaken it. Damage is not always visible. A damaged car seat MUST be replaced immediately.

## Expiration

On the side of the car seat there is a date of manufacture label as shown.

DO NOT use this car seat more than 10 years after the date of manufacture.

## Registration and Safety Notices

Although child restraints are tested, evaluated, and certified by the manufacturer and tested by Transport Canada, it is possible that a safety-related problem may be found. If there is ever a safety issue with your child restraint, we use registration information to reach owners.
Online: www.djgusa.com/registration/carseat/can
Telephone: 1-800-544-1108
Mail: Send your name, address and your child restraint's model number, manufacture date, line code, and date of purchase to:

## Dorel Juvenile Canada

 Consumer Care Department 2233 Argentia Road, Suite 110 Mississauga, ON L5N 2 X7Please do not send in your registration card if you have registered your child restraint online. For information on safety-related problems, you can also call Transport Canada's Road Safety Dept. at: 1-800-333-0371.

## Example of model number, manufacture date, and line code.

If you don't have the card or if your address changes, you will find the model number, manufacture date, and line code on the label located on the side of the car seat.

## Aircraft Information

This restraint is certified for aircraft use when used with the internal harness.

## Rear-Facing Aircraft Installation

Follow the steps on pages 11-17.

## Forward-Facing Aircraft Installation

Follow the steps on pages 22-28, skipping the tether strap steps.

## Booster Seat

This restraint is not certified for aircraft use when used as a booster seat because aircraft seats do not have shoulder belts.

Install the car seat in a window seat to avoid blocking the aisle. If the aircraft lap belt is too short, ask the flight attendant for a belt extender.
Use only on forward-facing aircraft seats. Contact the airline for their specific policies.

Some airlines may ask to see a label stating that this car seat is certified for aircraft use.
There is an airplane certification label located on the side of this car seat as shown.

## AWARNING:

You MUST store the UAS belt and tether strap when installing with aircraft belts.

## Warranty

Dorel Juvenile Group, Inc. (DJG) warrants this product to the original retail purchaser as follows: This product is warranted against defective materials or workmanship for one year from the date of original purchase.

## An original receipt is required to validate your warranty.

 DJG will, at its option, provide replacement parts or replace this product. DJG reserves the right to substitute if the part or model has been discontinued.To make a claim under this warranty, please contact our Consumer Care Department by phone: 1-800-544-1108 or text: 1-812-652-2525. Our hours of operation are from 8:00 a.m. to $6: 00$ p.m. EST Monday through Thursday and from 8:00 a.m. to 4:30 p.m. on Friday.

## Proof of purchase is required and shipping charges are the responsibility of the consumer.

Warranty Limitations: This warranty does not include damages which arise from misuse or abuse of this product.
Limitation of Damages: The warranty and remedies as set
forth are exclusive and in lieu of all others, oral or written, expressed or implied. In no event will DJG or the dealer selling this product be liable to you for any damages, including incidental or consequential damages, arising out of the use or inability to use this product.
Limitation of warranties and other warranty terms and state law rights: Any implied warranties, including implied warranties of the merchantability and fitness for a particular purpose, shall be limited to the duration and terms of the express written warranty.
Some states do not allow limitations as to how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you.
This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.
Neither DJG nor the dealer selling this product authorized any person to create for it any other warranty, obligation, or liability in connection with this product.
