# Selecting the Right Wet Mop to Meet Your Needs

## Productivity, Mop Size and Staff

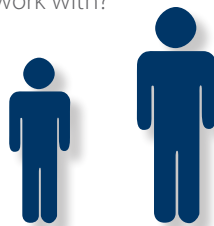

### Larger Mop Size, Greater Coverage\*

- Productivity rates based on looped-end mop, damp mopping with a single bucket

### Balance Productivity and Staff Capability

- What size mop can your staff safely work with?
- Assess the physical ability and stature of your staff to help select the right sized mop.

## Looped-end vs. Cut-end

### Longevity

- Looped-end mops outlast cut-end mops 8 to 1.
- Looped-end mops are designed to withstand repeated laundering.

Cut-end

Looped-end

### Performance

- Tailbanded looped-end mops cover more space in one pass than a cut-end mops.
- Looped-end mops help eliminate snagging, fraying, and linting.
- Looped-end wet mops can be laundered, cut-end wet mops cannot be laundered.

### Price and Total Cost

- Looped-end mops cost more to buy, but are far less expensive to use than cut-end mops when you factor in longevity and productivity.
- If you cannot launder mops or prefer a disposable approach to your mopping program, use cut-end mops.

## Greening Your Mop Program

### Hillyard Brand String Mops are the Environmentally-Preferred Choice

Hillyard brand string mops contain a high percentage of recycled content without sacrificing quality and performance.

By greening your string mop program with Hillyard brand mops, your organization is demonstrating a genuine concern for a cleaner, safer and healthier environment.

## Rough Surface Wet Mops

- Glide smoothly over rough, abrasive floors
- Microfibers pick up the smallest particles for deep cleaning
- Won't shred or lint on abrasive surfaces
- Heavy-duty strands stand up to everyday use
- Laundering not recommended

# Cut-End Wet Mops

**Yarn Types** — The material mop strands are made from.

- **Cotton** - Good absorption and retention
  - Minimal shrinkage, break-in required
  - Potential for mold and mildew
  - May lint, dries slowly
- **Blend** - Excellent absorption, 6-7 times its weight
  - Blend of cotton, rayon, polyester and acrylic
  - Excellent strength and durability
- **Rayon** - Quick absorption and low retention
  - Ideal for applying finish and disinfectants
  - Mildew resistant, minimal lint, fast drying

**Yarn Ply** — The number of strands twisted to make one string.

- **4-ply** - Light to medium duty
  - Greater absorbency than higher plies
- **8-ply** - Greater strength, excels on abrasive surfaces
  - Not as absorbent as 4-ply

**Headbands**

**Bolt-on**      **1.25" Width**      **5" Width**

The bolt-on headband improves maneuverability and helps the mop lay flat on the floor for improved coverage.

**Fantails**

Fantails prevent tangling and reduce snagging. Mops with fantails provide much greater surface coverage than ordinary cut-end mops, improving productivity.

Cut-end wet mops are NOT launderable.

# Selecting The Right Dust Mop

## Daily Dust Mopping Extends the Life of Your Floor Finish

Daily dust mopping, as soon as possible after high traffic periods, removes the dirt and soils that cut, abrade and dull floor finish, extending the time between strip, scrub and re-coat operations - saving time and money.

## Improve Dust Mopping Productivity

The right-sized dust mop can dramatically improve productivity. Using a 60" wide dust mop instead of a 48" wide dust mop on an 8 foot wide hallway floor yields a 33% savings in time and effort - less trips up and down the hallway.

How many passes does it take to dust mop a hallway?
