

## ANATOMY

Respiratory System	
Trachea	Windpipe
Bronchi	Main airways
Bronchioles	Smaller airways
Alveoli	Tiny air sacs
Diaphragm	Muscle that contracts and relaxes to breathe
Rib cage	Protects the lungs
Pharynx	Throat
Larynx	Voice box
Epiglottis	Prevents food from entering the lungs
Tracheal cartilage	Keeps the trachea open
Surfactant	Substance that keeps alveoli from collapsing
Capillaries	Small blood vessels for gas exchange
