

17022RA

6" IC Remodel Slope Ceiling Airtight Housing

Product Description

Suitable for remodel construction in residential and commercial applications. Designed for slope ceiling installation for ceilings from 2/12 to 6/12 pitch. The socket pivots to allow the lamp to be aimed straight down regardless of ceiling pitch. IC rated. Suitable for direct contact with insulation.

Housing

Aluminum construction provides greater heat dissipation. Washington State Energy Code approved to meet restricted airflow requirements. Airtight housing limits the exchange of air between ceiling plenum and heated/cooled areas. Integral thermal protector guards against improper lamping and misuse of insulation materials. Adjustable socket bracket assures proper and consistent lamp positioning. 8 3/4" height allows use in 2" x 8" joist construction.

Junction Box

Listed for through branch circuit wiring and includes several 3/4" knockouts. Supplied with three push-in wire connectors.
