

The cell wall is a rigid structure that provides support and protection. The cell membrane is a thin layer that controls the movement of substances in and out of the cell. The nucleus contains the cell's genetic material. The vacuole stores water and other substances. Chloroplasts are responsible for photosynthesis. Mitochondria are the powerhouses of the cell, producing energy.

## FALCETILE

The falsette is a traditional instrument used in many cultures. It is known for its unique sound and is often used in folk music. The instrument is made of wood and metal and is played by blowing air into the reeds.
