

PROBLEM SET

NAME: _____

1. The first section is a large rectangle with a width of 10 units and a height of 5 units. It is divided into four smaller rectangles by a vertical line at the 5-unit mark and a horizontal line at the 2.5-unit mark. The top-left section is a square with side length 5 units. The top-right section is a rectangle with width 5 units and height 2.5 units. The bottom-left section is a rectangle with width 5 units and height 2.5 units. The bottom-right section is a square with side length 5 units.

2. The second section is a large rectangle with a width of 10 units and a height of 5 units. It is divided into four smaller rectangles by a vertical line at the 5-unit mark and a horizontal line at the 2.5-unit mark. The top-left section is a square with side length 5 units. The top-right section is a rectangle with width 5 units and height 2.5 units. The bottom-left section is a rectangle with width 5 units and height 2.5 units. The bottom-right section is a square with side length 5 units.

3. The third section is a large rectangle with a width of 10 units and a height of 5 units. It is divided into four smaller rectangles by a vertical line at the 5-unit mark and a horizontal line at the 2.5-unit mark. The top-left section is a square with side length 5 units. The top-right section is a rectangle with width 5 units and height 2.5 units. The bottom-left section is a rectangle with width 5 units and height 2.5 units. The bottom-right section is a square with side length 5 units.

4. The fourth section is a large rectangle with a width of 10 units and a height of 5 units. It is divided into four smaller rectangles by a vertical line at the 5-unit mark and a horizontal line at the 2.5-unit mark. The top-left section is a square with side length 5 units. The top-right section is a rectangle with width 5 units and height 2.5 units. The bottom-left section is a rectangle with width 5 units and height 2.5 units. The bottom-right section is a square with side length 5 units.
